**College Heads Tell Story**

The football season is over, but that doesn't mean it's all over. The story of the season is the story of college football, and it's a story that is told in many ways. Dr. Mary E. Thompson, president of the American University, has called attention to the fact that the season has ended, but the spirit of college football is far from over.

Dr. Thompson said, "The season may be over, but the spirit of college football is still alive. It's a spirit of teamwork, of sportsmanship, and of tradition. And it's a spirit that we should all try to keep alive, even when the season is over."

You Can Come Out of Your Hiding Places Now—Basketball Starts Saturday

By Dick Goldburg

Back in 1928 basketball news centered around a tall, dark, and handsome former star, Nat Holman by name who had just been appointed basketball coach at City College. At twenty, he was the youngest college coach in the country besides being a leading figure in professional basketball.

Sports pages across the country acclaimed the coach when City College team triumphed boldly Yale, Columbia, Syracuse, and Navy among others. Those same pages told the story of how Holman the player was the East's leading scorer and a standout performer on the championship former season.

The year hotel by Nat Holman joined the Original Celtics and his brilliant play helped make them the greatest court aggregation of all time. Meanwhile City College basketball began to gain national prominence. Under the guiding hand of Holman, City College teams amassed near perfect records. From 1929 through 1931 CCNY produced another amazing average of over 20.

Saturday night Nat Holman will inaugurate his twenty-second season of coaching behind the City College when the Beavers face the Violets at the University of Pennsylvania. As it the season of the same caliber, HU has been issued. Today he is regarded as the foremost authority and coach in college basketball.

We were speaking to Coach Holman recently about his work and found amount in asking him what he thought of this season's schedule.

"It's a little easier than some years," he replied.

"But not as easy as the days when Captain Angie Montella, Jock Gurney, and Paul Schoenheitman had to do more than face the basket. Schoenheitman was a troublemaker and Holman's a self-taught innovator who runs a tight schedule and keeps his players as busy as the season permits."

"The teams play them every year, and the contests are keen. "The boys play together and they look good in their uniforms or the court and they run, and they can't be taken.

"We will be talking a few points science and I've been using new combinations this year to improve our winning totals."

"The season is a very difficult one, and we have to be at our best at every contest. Last year's NYU victory has given us a good start and we're looking forward to improving steadily."

"And with that Nat Holman gathered a basketball team that has been flown together, blew his whistle and with a smile ahead of "Play" started another practice session rolling.

SPORTS SHORTS

Nat Holman is starting his season with as many men as did Benny Friedman who is already back. This is a very strong team and we'll be playing them as hard as we can.

The Green-Ball conference hasn't affected Jimmey (American League) Angle Montella axis. Every eligible member of the squad has a number and all their shots are directed towards the basket. The passing, stealing, and fouling are all round into their respective shapes for the coming season. Coach Joe Super has arranged a pre-season meet December 4 with the New York
