City College received and accepted yesterday afternoon a bid to the National Collegiate Athletic Association basketball tournament. The team will play Mount St. Mary's College at Emmitsburg, Maryland, Monday night, in the first round. Should the Beavers win, they will play at a neutral court in the metropolitan area, with CCNY as the host, March 9.

President Buell G. Gallagher announced acceptance of the bid at his weekly Wednesday press conference. He said, 'The NCAA tournament invitation for the basketball team has supplied a fitting climax to one of the most successful athletic seasons in the College's history. Our general success in all sports makes it all the more meaningful to us students and alumni by the absence of commercialism and our refusal to compromise educational standards in our athletic program.'

Professor Arthur H. Deewey, faculty-manager of athletics, received a call at approximately 11 a.m. yesterday from Willa Stetson of the selection committee for the NCAA's second district, asking if the College would accept an invitation to play in the national tournament.

Mount St. Mary's, the second oldest Catholic college in the United States, has been the champion of the Mason-Dixon Conference for the past four years. Its record for the season to 1947 conference play 12-1.

The Mountaineers are led by captain Jack Sullivan, 6'4, the only senior on the squad. Each time he scores a point, each time he grabs a rebound or makes a foul shot, he sets a new record for the Blue-and-White.

Leaves today

The basketball team will leave New York by bus Sunday afternoon and probably stay at a hotel in Gettysburg, Pennsylvania, according to Dr. Deewey. The team will stay overnight Sunday and Monday and journey to New York Tuesday to begin play.

At Last
Not many of us remember the ‘40s—50s when the “Clintonesque” team made a double grand slam by winning the National Intercollegiate Athletic Association and Eastern Intercollegiate Athletic Association.

But as far as loving one’s enemy goes, I cannot see the possibility of it. The opposite, a hate originating from childhood, is really too strong.

But Dr. Batter presented the secular approach to the problem. It wasn’t as if one person were trying to change another’s heart to love his neighbor. Going a step further; is it religious ideal, without ever believing in the divinity of religion.

Dr. Levy, an Anglican minister, said that only through an individual’s recognition of his own sinfulness and the sinfulness of others could there be true brotherhood.

While Dr. Van Santvoord said that in the most religious of eras of history, tolerance was the hallmark of the religion, and that tolerance was the hallmark of the religious ideal. We can, he thought, attain brotherhood through recognition of the common ancestry of man, must treat even the person he dislikes like a brother.

That's the way it is. That's the way it has always been. That's the way it will always be.

It has taken seven long years for bas-ball to come out of the cold war. It is a time of victory and happiness. But as far as loving one’s enemy goes, I cannot see the possibility of it. The opposite, a hate originating from childhood, is really too strong.
