Students Register as New System is Tested

**By CHRISTOPHER A. WARD**

**16,818 Enroll for Fall Semester**

"The highest number of students registered at Baruch since the fall of 1975," said Thomas McCarthy, the school's registrar about the Fall, 1987 registration which processed a total of 16,818 people. The total surpasses a mark set while Baruch had open admissions and free tuition. In fact, McCarthy said Fall 1975, "was the last time that CUNY had an open registration without tuition."

The 16,818 figure represents an increase of 474 over the Fall 1986 registration, and 912 more than Fall 1985. McCarthy attributes the increase to better student retention, rather than a jump in new student registration. 1,816 new freshmen entered Baruch this fall, making it the largest freshmen class since 1982. New transfer students totaled 1,697, the largest number since 1982. New graduate students are down from last year, which McCarthy attributes in part, to "a change in entrance standards."

The total number of new students combined represents an increase of 77 students over the Fall, 1986 total. Since the increase over last year student registration totals 474, McCarthy pointed to the 77 student increase as proof that Baruch is retaining more of their students. He stated, "Less people are dropping out, new student registration represents an increase of less than 100 new students over last years total. The remainder of the 400 student increase comes from student retention. More students are continuing with school."

The Ticker

December 12, 1987

Editor: We are not the only people outraged by the recent events at the University of Texas. John Greco, the special assistant to the chancellor, published a recent article in the Staten Island Advance saying that he did not know whether he preferred vanilla or chocolate ice cream. The first question on the campus survey was "Do you prefer vanilla or chocolate ice cream?" I think that Mr. Greco should be fired for this.

I am much more concerned with the issue of Omitting OP-ED submissions in the Ticker. John Seidman, the editor of the Ticker, has the obligation to present news and features objectively and fairly, because these programs are viewed by students throughout the Baruch community and should convey factual information. Omitting OP-ED submissions is not only unfair, but it sets a dangerous precedent on the part of the journalistic principle at work in this organization.

I believe there are two issues here. The first issue is that the Ticker, as the official organ of the college, should publish a variety of viewpoints, even extremist ones, on its pages. The second issue is that Mr. Seidman, or the editor, should not be able to pick and choose what viewpoints he wishes to publish. He should be bound by a strict set of journalistic standards.

I would like to make a quick aside here for The Ticker, the campus newspaper, is the voice of the students at Baruch College. It is not just a news publication. It is a student publication. The students are the ones who are responsible for running it. The editor is the student who is in charge of it. If the students do not agree with the editor's choices, they should not keep voting for him. The students should try taking him over and running it themselves. But the students are the ones responsible for this publication.

Diane Leppek, Student Senator

Reflections of a Graduate

Michael Robinson

June 6, 1987, the day finally arrived; the culmination of three years of classes, papers and presentations. Finally, Michael L. Robinson, Dean of Students, handed me a diploma in front of my astonished classmates. It was an emotional moment for me. I had graduated! I had a title of respect. It was a time for me to reflect on the past three years. I had never been happier at Baruch College.

I had heard that the choice between a career and further education was a difficult one. I had been torn between the two. I had made it. I had decided to pursue a career in education. I had decided to go to graduate school. I had made the right decision. I had accomplished my goal. I had graduated.

The special student to whom I refer is not necessarily a 4.0 GPA student. It is the student who has learned. It is the student who has taken advantage of the opportunities available. It is the student who has learned the discipline and the practice of learning. The student who has learned the discipline and the practice of learning is the student who has the most to say about their experience. It is the student who has learned the discipline and the practice of learning who has the most to say about their experience.

We have a situation where teachers don't expect very much from their students. This is unfortunate, don't ask for very much.

Laura Kryshak
LESS NUKE'S MEAN BIGGER DEFENSE BUDGETS

By Jim Leinane

The policy implications of arms races past - and especially the current one - are the subject of much discussion. There are those who believe that it will lead to reductions in future defense budgets; there are those who believe it will lead to increases. Still others have argued that the current arms race is unique and will not lead to a reduction in defense budgets but will instead lead to a new arms race.

The current arms race is unique in that it involves the use of advanced technology. The systems being developed are designed to absorb a large percentage of defense budgets and are becoming increasingly more expensive. This is true of both the American and Russian programs.

The American program is focused on developing a new generation of fighter aircraft. The Russian program is focused on developing a new generation of strategic bombers. Both programs are expected to cost billions of dollars.

The American program is expected to cost at least $100 billion dollars. The Russian program is expected to cost at least $30 billion dollars. These figures do not include the costs of operating and maintaining the systems.

The current arms race is also unique in that it involves the use of advanced weapons systems. The American program is focused on developing a new generation of cruise missiles. The Russian program is focused on developing a new generation of submarine-launched ballistic missiles.

The American program is expected to cost at least $30 billion dollars. The Russian program is expected to cost at least $50 billion dollars. These figures do not include the costs of operating and maintaining the systems.

The current arms race is also unique in that it involves the use of advanced technology. The systems being developed are designed to absorb a large percentage of defense budgets and are becoming increasingly more expensive. This is true of both the American and Russian programs.

Deans, faculty and administrators welcome Class of '91 to Baruch.

By LINDA ZUECH

Baruch College has the highest freshman retention rate among the 12 four-year colleges in the City University of New York (CUNY) system, according to Baruch’s Profile of American Colleges 1987-88. Baruch’s 81% retention rate is the highest in CUNY and just below the national average for four-year colleges which stands at 83%

Tina DeCarlo, the program director of the college’s Center for Social Policy Studies, said the retention rate at Baruch is a direct result of the college’s commitment to student success. "We have a very strong focus on helping students succeed," she said. "Our faculty and staff are dedicated to creating a supportive environment for our students."

Baruch’s retention rate is a testament to the college’s commitment to student success. "We have a very strong focus on helping students succeed," said DeCarlo. "Our faculty and staff are dedicated to creating a supportive environment for our students."

Elizabeth Toohey has recently occupied the position of larger coordinator at Baruch. Toohey is a student-run organization responsible for the health and social needs of the student body. She is the first coordinator of the organization, which was established last year.

Toohey holds a master's in psychology from Teachers College at Columbia University. Before coming to Baruch, she was associate director of the Student Life Program and faculty advisor for the National Chi Omega. She is also a member of the American Psychological Association and the American Counseling Association.

Commenting on the AIDS Task Force, Toohey said, "I think that it is important for the students to be aware of AIDS and not ignore it. She expressed an interest in becoming involved in Baruch's AIDS Task Force, which is headed by Dr. Johnson. However, Toohey stated that students "would be more informed." She continued, "I would like to see our students receiving more education. They will ask in their friends about AIDS, but won't take the time to understand it. Toohey and the AIDS Task Force believe that the current and future students will take time to help others arm themselves with knowledge. This training is offered by the consultant. Students are taught importance. AIDS must be brought into curriculum, and students need to become aware of the dangers and depression and other behavior which might affect attitudes. They are asked to talk about the importance of practicing monogamy and periodic testing for both students and partners. The AIDS Task Force is a small group that is highly involved in the school and students.

Edwin Penton, an upper junior and director of the AIDS Task Force, described the program's purpose as a "nursery" for students. At Baruch, students do not have a campus to rely on. Many students are confused and do not take the time to understand the school. Students are taught importance. AIDS must be brought into curriculum, and students need to become aware of the dangers and depression and other behavior which might affect attitudes. They are asked to talk about the importance of practicing monogamy and periodic testing for both students and partners. The AIDS Task Force is a small group that is highly involved in the school and students.

According to Penton, the new school of the School of Liberal Arts and Sciences, Baruch has a variety of programs. This program recently discussed its mission and its plans for the future. The task force is working with the Student Affairs and the Administration to create an action plan in faculty development and support. Fainstein considered the importance of maintaining and improving the future of the college and the school. A team of faculty and administrators is working on the school's future. The team is made up of people who pursue technical careers, who are in business, science, or engineering, and are well-educational. I think that we are all being educated. In this education, we are making decisions that affect thousands of lives and I think we need to make informed decisions.

Fainstein has become the life of the major public at Columbia University. Before coming to Columbia, he taught sociology at Columbia University. He added that he would be interested in the future of the college and the school. The team is made up of people who pursue technical careers, who are in business, science, or engineering, and are well-educational. I think that we are all being educated. **Baruch is a Jewish club not just for Jewish people**

By NANNETTE F. GORDON

In less than two weeks, Baruch students and faculty will not be in school due to the Jewish holidays. Many of those faculty and students who are Jewish will be celebrating the holidays. One organization at Baruch which celebrates together is Hillel.

Hillel, a D.S.S.G. funded organization, is one of the few Jewish organizations left at Baruch, which provides Kosher services. Hillel is located at 137 East 2nd Street in room 304, a diversified organization focusing on the different aspects of the Jewish community.

Hillel is a Jewish club not just for Jewish people. "He is a Distinguished Professor of Education..." Johnson said. Among his many goals, Bergquist wanted to develop high standard of programs in the school and make the links between these education programs and other education, such as other colleges, public schools, and the Baruch community, as strong as possible. Bergquist said, "I don't want to have Baruch isolated anymore." Hillel is one of the few Jewish organizations that remain.

**SPORTS**

**BARUCH'S SEASON UNDERWAY**

"Soccer starts season at .500..."

**BY MARK CALLAHAN**

New York — Sept. 4, 1987

It may be time for New York fans to hang up their cleats and begin to look forward to spring training. Even though this season isn’t completely over, both teams are facing an uphill battle. Although the Mets and Yanks have their work cut out for them, the Mets have the upper hand.

The Mets are three and a half games out of first place. In the past, the dedication of Baruch’s athletes was set aside for better things. It’s time that the school recognized the work involved in joining a team.

Most people are unaware of the fact that there are seven different sports that have started this year. They play various positions, and all of them are extremely difficult to do at Baruch College. However, the dedication of the athletes has been brought to almost full control of first place.

On the men’s side, the baseball team is having a strong season. Their record for the season begins at .500, with 90 R.B.I’s. Bobby Ojeda has yet to return. Despite the consistency of Keith Hernandez’s 303 batting average, Joel Skinner and Mark Salison are two promising catchers that both teams are having a strong season.

No one can be disappointed in how either team looks in good shape. In the past, the dedication of Baruch’s students has been brought to almost full control of first place.

**DOWN TO THE WIRE**

**BY MARK CALLAHAN**

As the school semester begins, and the students begin to settle into the routines of the students, the sports season gets underway. The Baruch College students are excited for the new season.

Many of them are looking forward to the fall season, which includes football and basketball. The fall sports are extremely popular on campus, and many of the athletes sacrifice a great deal to play.

Many of the athletes sacrifice a great deal to play, including giving up their jobs during the school year because practice and games take up most of their time. In between studying, playing, and working, they must also find time to eat. Some eat in the cafeteria, while others eat at local HP restaurants.

Because the season is just beginning, only one sport has begun. The men’s soccer team has played two games already. Their record for the season begins at 2-0.

The men’s basketball team, which started the season with a 3-0 record, has played its first game against the University of Rochester. The Mets have six more games remaining in the regular season.

**THE OFFICE OF COUNSELING AND PSYCHOLOGICAL SERVICES**

**THE OFFICE OF COUNSELING AND PSYCHOLOGICAL SERVICES CAN HELP YOU ACHIEVE YOUR GOALS!**

The Baruch College Office of Counseling and Psychological Services has a Staff of experienced and professionally trained psychologists and counselors who can help. Services are provided free of cost to all Baruch students. Every student’s contact with the office is strictly confidential.

Layout by Diane Leppek
**Killed by Technology**

**Videwriter — Killing Technology**

The second release from Canada's best loved metal band, Real Men Kill, is titled "Real Men Kill." It begins as standard fare, but midway through, the band's style begins to change. At this point, the music begins to lose its appeal, and the band begins to lose its edge. The result is a album that is both superior and inferior to its predecessor.

"Forgiveness in Space" is arguably the best song on the album. It is a performance of some of the band's past material, but with a fresh perspective. The song begins with a dark, heavy metal intro, followed by a more mainstream chorus. The result is a song that is both accessible and challenging to fans of the band.

"The Event of a Nuclear Meltdown" is a song about the dangers of nuclear power. It is a powerful and thought-provoking song, but it is not without its flaws. The song is a bit too long, and some of the lyrics are a bit repetitive. However, the song is still a strong piece of work, and it is a testament to the band's ability to write songs that are both enjoyable and thought-provoking.

"Miami Vice" is a song about the Miami Vice television show. It is a fun and energetic song, and it is a great representation of the band's ability to write catchy and memorable songs.

Overall, "Real Men Kill" is a solid album, and it is a testament to the band's ability to write quality music. While it is not without its flaws, it is a strong and enjoyable album that is sure to please fans of the band.

**The Next Generation**

**By MARTIN STARKEY**

"The Next Generation" is a reference to the upcoming crop of young leaders who are poised to take the stage. The reference is to the generation that follows the Baby Boomers, who are known for their activism and their willingness to challenge the status quo. The reference is also to the generation that follows the Millennial generation, who are known for their tech-savvy and their willingness to use technology to their advantage.

"The Next Generation" is a song about the challenges that the new generation will face. It is a song about the importance of education and the importance of making informed decisions. It is a song about the importance of standing up for what is right and the importance of working together to create a better world.

"The Next Generation" is a powerful and thought-provoking song, and it is a great representation of the band's ability to write and perform music that is both enjoyable and thought-provoking.
Mailier's Film

A woman (sought by her ex-husband) drives a stolen car to a small town. The town is filled with strange characters, including a man who claims to be a descendent of Pocohontas. Mailier's film explores themes of identity, family, and the impact of the past on the present.

Now, Breast Cancer Has Virtually Nowhere to Hide.

The best weapon against breast cancer is early detection. And that's why a mammogram is so important.

Stark Shooting From The Lip

By MARTIN STARKEY

You can't take the night out of the man, and you can't take the man out of the night. That's why they call him "The Lip." He's a shock-jock, a man who knows how to make his voice heard. And he's ready to take on anyone who dares to challenge him. He's been called "The Lip" for his ability to speak his mind, no matter what.

Musical Poetry

The Irish Works/ - If You Want To Defeat Your Enemy Say His Song Before You Die

The Irish Works' newest album, If You Want To Defeat Your Enemy Say His Song Before You Die, is a powerful statement against war and violence. The album features a collection of songs that explore themes of peace, love, and unity. It's a call to action, a reminder that we must stand together to overcome our differences and create a better world.

RUSSIAN FLOP

(Audubon Live in Moscow
(A & R Records)

What it is one of the most unkind
sentiments that can come out of the U.K. in quite some time. They have been
shining bright through our own doctors, for a long time. Last summer
that period was true for the U.K. and
many people were worried about how the band would fare during the
concerts and what would happen. Rozema explains.

As for the matter of theirs, the band
recently took a trip back to "That's The
Kiss," very heavily loved by 8 of the
songs that they've released. Unfortunately,
that's not the case of quite a few and not
enough or just whatsoever the things like
that appear. It's always something that
appears on such a monumental album, but
it's always something among those two.

This tour has been documented to
either become a film or a video release,
perhaps they might create a soundtrack
with the movie which might hold some
material as well. The film that can be
marked by the one which a hit has
arisen.

Finally, the liner notes make very little
mention of people who cite or discuss
the usual. Usually a liner is filled with
pictures or words about the tour. Once
this is the package in the album cover
itself. They did some things this album
that we didn't see while recording it.

When you don't have a father, you reach out to a
When you can't find a stranger, you kidnap one.

BAD IS GREAT

Michael Jackson - Bad
(Type-CBS Records)

For a 1/2 year some of us waited or
while some of us couldn't care. Some
of us were doing our cows with our
chests while some of us were hoping never
ever to hear a song as mindless and inane
as "Bad." This five song out of five
have been recorded somewhere in North
North America. Another that little feet for
the Russian crowd that it seems that no
enough. The only one is that people in the
U.S. and the morphology who are
very little. The album follows a steady
flow as such. The band...
