**Ex-Professor Accuses Student of Assault**

By MARK CALLAHAN

A former faculty member from the Psychology Department at Baruch was allegedly shoved in an elevator at 111 E. 18th Street on Sept. 28, according to Paul LeClerc, the provost. The former adjunct lecturer was identified as Elaine Bow by Henry J. McLaughlin, director of security.

A witness to the incident, who chose to remain anonymous, said, "The professor ran from the elevator to the security guards shouting, ‘I've just been assaulted! Call the police!’" When asked by the security guards who the assailant was, she motioned to a young black woman who had also exited the elevator. She continued screaming, ‘Stop her! Detain her! Aren't you going to stop her? Aren't you going to call the police?’

The witness said the security guards told Bow that he could not call the police from the desk phone and would have to call his director before doing anything. As the security guard made the call a second guard walked away from Bow. “She then kicked the guard twice in the leg,” the witness said. “Then, the lady (Bow) said, 'That girl told me you would not stop her because you and she were both black. She was right, all of you are as one!' She then said she was going outside to call her husband and the police.”

“She returned three or four minutes later with her husband, who was also upset,” the witness said. The witness went on to say that as the husband had words with the guards, “the teacher became very upset. She got out of control and...” (Continued on Page A11, Col. 5)

**DSSG Forced to Cut Personnel Hours in Half**

By CAITLIN MOLLISON

The Treasurer's Office of the Day Session Student Government has been forced to reduce the number of personnel hours by 50 percent compared to last year, according to a memo written by Edward Mills, treasurer of the DSSG, to student clubs and organizations.

Mills said that the DSSG is currently operating with 30 personnel hours a week as compared to the 60 worked last year. Additionally, the student government is utilizing the services of only two bursars, a decrease of two from the four employed last year. Mills, in the memo, attributes the reduction in both number of personnel and hours worked by personnel to "budget cuts."

The personnel hours being cut are those of the bursars the DSSG employs to process the club vouchers.

Earlier this semester Mills said that the cut in hours was due to a "lack of communication."

Board Voted 20-15 to Reject Request

By SALVATORE F. BELLUOMO

The Baruch College Alumni Association voted against the funding of a lecture by Dr. Ruth Westheimer, renowned expert on sexuality.

The Board voted 20-15 to reject a request by the Day Session Student Government to fund this event. The defeat is blamed on the DSSG's failure to follow proper board procedures. According to the alumni director, Ed Jaworski, "John Richards (president of the DSSG) and the DSSG did not bring the project to the proper committee for review, which would lead to their recommendation."

According to Richards, "The first vote was close; 15 for (and) 16 against with four abstentions. They asked me to leave the room for the second vote. The second vote was 15 for, 20 against. We lost the measure by five votes."

Richards said the reason the Alumni Association gave for turning down their (the DSSG’s) request was "we failed to go through the committee process." Jaworski said, "If proper procedure would have been followed, perhaps the vote would have been different."

The interest in having Westheimer speak here arose from the DSSG's perceived need for the Baruch Community to be educated on the subject of AIDS.

The DSSG solicited the alumni association for funding first. Richards said, after the alumni association turned them down, "We don't have the personnel time to handle their vouchers so we..." (Continued on Page A8, Col. 5)

**Students to Vote on Fee Increase**

1,200 Signatures Place Referendum on Ballot

By JOHN RICARD

A student election will be held on Oct. 13-15 to decide whether a proposed $13.65 increase in the student activities fee will take effect.

According to DSSG president John Richards, who along with the entire DSSG is strongly opposed to the increase, "SEGRC (the Student Elections and Student Governance Review Committee) had requested that even though we only need 800 signatures, we come up with a 1,000. Because of widespread support we enjoy from the clubs, and the Helpline, in particular, and the vigorous efforts of people in athletics, and of our own illustrious and tireless government, we came up with over 1,200 signatures after only five days."

Carol Robbins, the advisor to SEGRC, said, "The election laws say that in order to place a referendum on a ballot there has to be a petition for referendum by at least ten percent of the students."

Robbins said, "We received just over 1,300 signatures. The committee also verified the signatures by spot checking at least eight out of the 20 signatures on each page. Each name was read off and they were checked to make sure that one, the name was that of a day student and two, that the name matched the student's social security number. The names were also reviewed to check for duplications."

According to Robbins, "The requirement is that five signatures per page (of 20) must be checked. We did at least eight. We found around 50 signatures that were void. Most of those were duplications or not the signatures of day students. They (the students requesting the referendum) submitted the petition with enough of a cushion so that they still got the necessary number between 900 and 1,000. The committee had time to do a very thorough spot check and I was pleased with that."

If the increase is passed the cost of the student activities fee, which is paid by all full-time day session students during registration each semester, will rise to $30.00. The student activities fee is presently $26.35. The activities fee for part-time students would increase from $17.35 to $23.85. Richards said, "People say (that) is a lot of money to pay, but you have to look at what it can get you. It can give you a much more effective campus media. We have a paper like the Ticker, and a station like WBBM that could do a lot better with additional funding."

"You've got to understand that WBBM is not funded by the administration. Every penny (of their funding) comes from the student fee. Every aspect of athletics, including bows and arrows, uniforms and some coaches' salaries are paid by the student activities fee," said Richards. Robbins said, "SEGRC can decide when the election was to be held. It was requested that the election be held soon. They're interested in having the fee increase effective beginning in the spring. In order to do so it must go before the November CUNY board. Before it can do that it must be reviewed by..." (Continued on Page A9, Col. 1)
Unethical Lobbying

During the last couple of weeks, student organizations such as the Day Student Government, have voiced their anger about the financial measures taken to secure support for the increase have been considerable, or at the least, a reflection of a group of students determined to use whatever means to do so. But unfortunately, the picture has been tainted with the unethical actions of a few in lobbying for support.

The Freshman Seminar Program reserves five to ten minutes for a guest speaker from Helpline. The student organization has been requested by the seminar's faculty members to allow Crum to carry the entire financial burden in a situation where they are in part bringing in speakers, the money that N.Y. 10010...do so in the future.

Support For Higher Education

By GLENN PALMER

The hands of judges. He believes that Con- 
"society is to encourage those with 
high-quality education. Law and govern- 
ment leaders have a role in this. But so do 
all of us. It is necessary to share the 
burden of cost. And that includes 
the burden of understanding and apprecia-
tion of the value of a college education. 

The following article is intended to 
remind everyone of the importance of 
education. It is a plea for financial sup-
port for colleges and universities. Much 
of this is the responsibility of the fed-
eral government, but it is also the responsi-
\bility of states and local governments. 

The title is "Support for Higher Edu-
cation". The article begins with a state-
mment about the importance of higher 
education. It notes that "higher education is a 
prime example of what can be achieved 
when taken advantage of." The article 
then goes on to discuss the benefits of higher 
education, such as "improved job opportu-
nities, increased earnings, and a better 
quality of life."

The article also states that "higher 
education is a necessity for our society. 
It is the foundation for personal growth 
and development. It is also the key to 
success in the workforce."

The article concludes with a call to 
action. It states that "everyone should be 
encouraged to support higher education. 
This includes students, parents, and 
the community at large. It is the responsi-
\bility of all of us to ensure that higher 
education is accessible to everyone."

BORK MISCONCEPTIONS (Continued from Page A4)

The mass hysteria and fear generated 
over Judge Bork's nomination to the 
Supreme Court has largely been un-
found.

BLOOD DRIVE SCHEDULED FOR OCTOBER 27-29

By LINDA ZUECH

The Baruch College/Campus Bookstore's Second Annual Blood Drive will be held Tuesday, October 27 through Thursday, October 29 from 9 a.m. to 4:15 p.m. at the Student Activities Center, third floor. For further information, call 727-7200.

To participate, you must be between 17 and 75 years of age and weigh at least 110 pounds. You must be in perfect health and have no conditions that may prevent a person from donating blood on the day of the drive. You must also be at least 18 years old or have parental consent.

The College Blood Drive will be held in cooperation with the American Red Cross. The event will be staffed by trained blood bank personnel.卞

An opportunity to do something that will save lives.

Each donation will save the life of five people. Those who give blood are not at any risk from donating, according to the College Blood Drive director, Carl Aylman.

According to Aylman, "Giving blood is perfectly safe. It's a chance for people to do something that will save lives." He added, "The need for blood is great. If there isn't blood available, people will die." Aylman said, "It's a chance for people to feel good about themselves." He added, "The need for blood is great. If there isn't blood available, people will die."

The Blood Drive will be held Tuesday, October 27, at the Student Activities Center, third floor. Each unit of blood donated will be screened for components, white cells and platelets, plasma, and malignancy. All those who give blood will receive a complimentary gift from the Red Cross.

For further information, contact Carl Aylman at 727-7118.

An Extraordinary Life
Remembered: the Swedenborg Foundation

By PHILIP J. KARRAGH

Swedenborg invented what we consider the world's first aeroplane. Leonardo da Vinci typically is credited with inventing the world's first aeroplane, but he didn't. It was Swedenborg. The Swedenborg Foundation is a non-profit foundation which works on the constitution and gifts of the public to keep the organization going, and to permit the foundation to exist.

Although credited with inventing the first aeroplane, da Vinci didn't.

Swedenborg invented the first aeroplane and submarine.

In Swedenborg's search for the soul, he didn't live in a vacuum. He was interested in the activities of all phases of the business and professional fields. The board met once a month. Seekamp said, at the foundation's headquarters, located at 139 E. 23rd St., off Lexington Avenue. Seekamp now is a vice president of Scandinavian Airlines System.

The Swedenborg Foundation is a non-profit foundation which works on the constitution and gifts of the public to keep the organization going, and to permit the foundation to exist. The foundation is named for science who inspired Helen Keller and explained Extraordinary up in England and in other places where he was living. He was known as Emanuel Swedenborg, the first person to coin the phrase "extraordinary." The church is located at 139 E. 23rd St.

The Swedenborg Foundation is a non-profit foundation which works on the constitution and gifts of the public to keep the organization going, and to permit the foundation to exist.

FEATURES

Entrepreneur Club

Are you an aspiring entrepreneur? If you said yes, the Entrepreneur Club at Baruch College is for you. Founded in 1983, the club offers a platform for students interested in entrepreneurship to connect, learn, and grow.

"We are a diverse club," the club secretary explained. "Everyone can contribute to the club's success, whether they have experience or not. We aim to foster a welcoming environment where members can share ideas, strategies, and insights.

The club meets bi-weekly to discuss various topics related to entrepreneurship, including case studies, guest speakers, and workshops. This year, we have a variety of events planned, including a seminar on 'Navigating the Start-Up Landscape' and a panel discussion on 'Success Stories in Entrepreneurship.'

In addition to meetings, the club hosts regular networking events, such as the annual Entrepreneurship Challenge, where students can pitch their business ideas and receive feedback from industry experts.

Entrepreneur Club is open to all students interested in entrepreneurship. If you're interested in joining, contact us at entrepreneurship@baruch.cuny.edu. We look forward to welcoming you to our club!

---

Beta Gamma Sigma

Beta Gamma Sigma is a professional honor society that recognizes outstanding achievement in business education. To join, students must maintain a high level of academic excellence.

"Being a member of Beta Gamma Sigma is not just about academic achievement," said the club president. "It's about connecting with like-minded students and professionals, as well as gaining access to a wide range of career opportunities.

In addition to networking, members have the opportunity to participate in various events, such as the annual Business Ethics Case Competition and the Beta Gamma Sigma Research Conference. We also offer mentorship programs and professional development workshops.

If you're interested in joining Beta Gamma Sigma, visit our website at bgs.org/apply. We look forward to welcoming you to the community of outstanding business students and professionals!

---

Investment Club

There are many clubs at Baruch College, one of which is the Investment Club. The club aims to prepare students for careers in finance and investment management.

The club provides members with the opportunity to learn about investment strategies, market trends, and economic indicators. Members also participate in investment competitions, such as the National Investment Competition, which helps students develop their skills.

"The Investment Club is a great way to gain real-world experience in the finance industry," said a club member. "We have the chance to work with real-world data and apply our knowledge in a practical setting.

Our club is open to all students interested in finance and investment management. Whether you're looking to build your resume or gain valuable networking opportunities, the Investment Club is the place for you. Join us today and take the first step towards a successful career in finance!

An Extraordinary Life Remembered

The Swedenborg Foundation

One problem the foundation has, according to Seekamp, is that "they are quite abstract." To overcome these problems, the foundation makes use of collateral media, such as videos, to bring the works of Swedenborg to life. Since the foundation would like to be able to gain CPA experience, they are planning to go back to the time Swedenborg was living. This is important as it is the time when Swedenborg was a seer and a scientist, and "his works have been replaced by compact disc players." Swedenborg, who was a seer and a scientist, produced more than a hundred books on topics ranging from science and metaphysics to religious philosophy. The foundation is planning to go back to the time Swedenborg was living, in order to make his works accessible to the public.

One of the problems with Swedenborg’s writings is that “they are written for a great, high-minded spirit, and there is a lot of it that we can’t understand,” according to Seekamp. “If we open the book, it just doesn’t make sense to us because the ideas are not translated.” The foundation has a committee devoted to making Swedenborg’s works more accessible to the public. Swedenborg’s principal achievements in science are the theories developed in his book "Gnosia," which translated from Latin means "a knowing or a knowing of the same." Swedenborg’s writings were once considered by a French philosopher, Voltaire, as "the best and most useful works ever written in the world." Swedenborg’s work has been translated into 22 languages and is being printed in English.

In addition to being a seer, Swedenborg was also a member of the Swedish Parliament, and a leader in the study of natural philosophy. He was also a great scientist, and formulated the philosophical doctrines of Swedenborgianism. Swedenborg’s contributions to science are: first to propound a nebular hypothesis; second, to develop the first systematic study of the brain; and third, to develop the first systematic study of the spinal fluid. The foundation’s work in this area is important as it is geared toward the public library, and "they are quite abstract." To overcome these problems, the foundation is planning to go back to the time Swedenborg was living.

Another area heavily stressed and encouraged by the foundation is the study of Swedenborg’s theology in New Physics. Swedenborg’s theology is centered around the significance of Sweden’s role in the study of Swedenborg’s work. The foundation is planning to go back to the time Swedenborg was living, in order to make his works accessible to the public.

A continuous film of Swedenborg’s work will be produced, and will be available to the public at the Swedenborg Learning Library and Inquiry Center, and from Great Britain, C. Roland Smith of the Swedenborg Society.

The U.K.'s Worst

The Wild Flowers - Dust

What a neat band. Tom and Joe, and Tom, and Joe, and Joe... Coke Middlesbro and Billie ID! The Wild Flowers. Formed four years ago in Wolverhampton, England, the band has recently released their debut album, Dust. A pop band that's been around in the UK for some time. Their sound is quite unique, combining elements of British pop with a touch of punk. The track "Dust" is a perfect example of their style. The lyrics are about loss and the band's ability to express their emotions. The sound is slightly melancholic, with a lot of layers and textures. Overall, a very promising band.

Hardcore Calypso

G.B.H. - No Hand to Hold (Cassette)

Whether G.B.H. is可认为是是 is beyond the scope of this discussion. Despite the genre's poor relation, the band has managed to create a unique sound that sets them apart from other bands in the genre. The album "No Hand to Hold" is a perfect example of their style. It's a fast-paced, aggressive album that's not for the faint of heart. However, it's definitely worth checking out for fans of the genre.

Last stage of G.B.H.

ALF

Formerly known as "Honey, I Shrink the Kids," the band has finally released their first album, "ALF." The album is a mix of pop and punk, with a focus on catchy hooks and memorable lyrics. The standout track is "But You Don't Know My Name," which features a powerful guitar riff and a memorable chorus. Overall, a great album for fans of the genre.

Ordinary Murders

With Robin's mention of "We want the world and we want it now," "phyllis" attempts to make the audience feel that the world is their oyster. The song "Ordinary Murders" is a perfect example of this. The lyrics are about the struggle to get what you want, and the feeling of being stuck in a rut. The sound is slightly melancholic, with a lot of layers and textures. Overall, a very promising song.

Attention Day Students

QUESTION: WHAT IS IT WORTH TO YOU???

1. To have many more interesting and diversified club events and prominent speakers??
2. To have well dressed and well equipped athletes to represent your Alma Mater??
3. To have a well maintained Student Center??
4. To have a more informed Communications network??
5. To have a better equipped and more peer counseling service??

ANSWER: AVAILABLE TO YOU FOR A LIMITED TIME ONLY FOR THE ADDITIONAL COST OF $13.65 FOR FULL-TIMERS, $6.50 FOR PART-TIMERS

Say Yes!

To the Student Activity Fee Increase at your Local Voting Booth

College Weekends $99 All Inclusive Drinking Age 18

Round Trip Transportation via Luxury Motor Coach

3 Days, 2 Nights accommodations at Hotel Palace Crescent or Europe

Campus Departures

Welcome Party at Twilight Zone Night Club

All taxes and tips included

Departure Dates:
October 23rd to the 25th
October 30th to November 1st

**Live Dead**

BY SCOTT PAM

Add to the Grateful Dead. Now for some more music that reached new heights in the City.

"The exhibition build-up, 12 mice and the concert is in '71 hours. Obviously, I am waving a banner—my father's—over the balcony. Lately, I have been thinking about the band, but they have left the music world behind. Some say everything was over, but I say that the music was just starting."

I think everyone knows the Grateful Dead. The Dead, a musical group that remained successful for many years, is considered one of the most influential bands of the late 20th century. Their music is known for its improvisational nature and their ability to create a unique sound on stage.

---

**Another Bon Jovi?**

**What If — After (War)**

**What If** is a new group, but most of what I know about them comes from the music they've put out before. Lead singer Steven Fordecker has sung back for a very successful group of artists including Motley Crue, Van Halen, and Billy Joel. John and Amy Gran Drummer Bob Willard has been a member of many other successful bands, including Journey and Foreigner. Lead guitarist Scotty McCallum's background includes working with Larry Wilson and the group Dr. Jekyll. Lead singer, Eric Caygill, Sheila E. Chaka Khan, and Phil Collins also have contributed to their sound.

Despite all of these accomplishments, the group's music does not seem to be as popular as their previous work. "The band's potential is huge," says one critic. "I hope they continue to develop their sound and create more interesting music in the future.

---

**Great Tonsils**

**Bananarama — WOW!**

Bananarama cut a slick-edged, naive rock single, "Na Na Na Na Na Na Na Na Na Na," in 1984. The song became an instant hit, reaching #1 in the UK and staying there for six weeks. The group's success continued with hits like "I Can't Fight It" and "Cruel World."

"The music of Melvin James is a religious experience. It's like the Grateful Dead. The band's energy is uncontrolled, and it's hard to ignore."

---

**WOW!**

**WOW!** is a new band that has gained a lot of attention recently. The group's members are all familiar faces in the music industry, with each member having their own successful careers. "The music is infectious, and it's perfect for rock concerts," says one fan. "I can't wait to see them live."
WOMENS’ VOLLEYBALL SEASON BEGINS

By MARK CALLAHAN

As the coldness of winter replaces the warmth of summer, so the winter sports catch the interest of fans. As teams become eliminated, the fans of those teams become less interested in the sport and move on to new and exciting things. I have a sport for the fan who is looking for something different. It has the continuous action of football, the exciting tension of horse racing, and the simplicity of tennis. Best of all, you can see it in your own school gym. I’m talking about women’s volleyball.

Many people must be thinking, “Volleyball, what’s the big deal about volleyball? That’s not so exciting.” That’s what I used to think until I decided to cover one of the games. I walked into the game with a negative outlook, for I had learned that the team had dropped the first two games to Fordham and NYU. I still kept up an open mind and prepared myself for objective reporting. The last thing I expected was to be impressed, but I was wrong. The game was against Manhattan College, a tall, aggressive team. My open mind slanted more towards the negative side when I saw the Baruch team. Many of them were small and didn’t look like good spikers. However, I wanted to see what would become of the game, still keeping an open mind. Baruch took the first two sets, but they lost the next two. Fortunately, the team pulled together for the final set. Everyone was on edge to see who would take the game. It came down to who wanted the victory more. Each point was scored with exuberance from the team, and yelling from a small but very loud and very dedicated group of fans. The team of Baruch just dominated the last set to grab a victory.

The team might be lacking in height, but they’re certainly not lacking in effort. The team that I saw gave a 110 percent. To me, the most impressive player on the team is Pilar Reinoso. She seemed to be all over the floor at every minute she played. Being one of the shortest spikers in the whole league would seem to be a disadvantage to most people, but it doesn’t seem to affect her. “I get a little bit of power which helps me a lot. I don’t think it’s a disadvantage,” Pilar replied.

Another impressive player is the captain: Tiffany Li. She is another player who is all over the court. She dives back and forth to save the ball from hitting the floor to save a point. Tiffany has to be the hardest worker on the team. The fans sweat just watching her play.

She sets a good example for the rest of the team; she makes a good captain. When asked to give the good and bad points about the team she replied, “I think this year the team has good potential if they put more commitment into it. Not too many people showed up for practice so far. We are very close and get along well; that helps a lot in the teamwork. We are far from last year. Since we’re new, we’ll [the new teammates] be here for a while. They’ll help the team in the future but right now it’s a disadvantage.”

Even with the slow start, the team has come back for a record of 6 - 4. From this record, height was not a great disadvantage. The girls are really trying their best and doing a good job. Congratulations to the team on their victories and to the coach, Elizabeth Burnett, for her success; keep up the good work.
