The implementation of a daycare program at Baruch is off to a slow start. Those students in need of daycare for their children will have to wait for the obstacles to be worked out, the future of the program will be decided.

The statistics of a recent questionnaire, printed in the August 30 issue of The Tickertoll, asking those who need the daycare to respond, are incomplete. However, the Dean of Students, Dr. Samuel Johnson, reports there is already some indication that students with infants need the daycare most, not students with toddlers. This poses some, with reasons that toddler care would not, such as the need for more room to play, not be as important and less capacity for caring for the needs of infants. In addition, there are very specific requirements as to the

Baruch College, CUNY

Maternity Leave Policy Removes College Employee

By DOUG BROHAN

College Office Assistant Jeanette Shuck blames "office politics" for her removal from the Student Activities Office. Shuck, who was not given her old position back, was transferred to the Registrar's Office because another College employee, Carmen Soler, returned from a three year maternity leave. Soler's original position was in the Dean of Student's Office.

"Jeanette had a certain energy with the students that we liked," said Debra Bick-Dugan, Assistant Director of Student Activites. "There is currently a petition being circulated by students asking that Shuck be reinstated at the Student Activities Center. According to one

Caribbean Club Initiates Jamaican Relief Effort

By MICHAEL G. ROBINSON

The Caribbean Students' Association of Baruch College has launched a "Can and Cloth Drive" to assist the victims of Hurricane Gilbert.

Gilbert, with the fierce hurricane of this century, devastated the Caribbean island of Jamaica killing at least 36 lives and making over 400,000 homeless. The damage is estimated to be in excess of $8 billion.

Trinidadian Andrea Ransonome is primarily responsible for initiating the drive at Baruch. She said that the Caribbean Students' Association will concentrate on obtaining clothing, and food items and clothing for the Jamaican hurricane victims. They intend to transform their club room, located on the 4th floor of the Student Center at 137 E. 22nd St., into a drop-off point where interested students can make their contributions.

Ransonome worries about what will happen after the barrage of media attention on the Jamaican situation ends. She stated, "The drive will continue as long as it is needed."

... there were only two jobs available. I pressed the issue as far as the Provost's Office in order to maintain status quo in my department," he stated and added that the final decision to place Shuck in the Registrar's Office was based on "the needs for the department (Dean of Student's Office)."

"Jeanette had a certain energy with the students that we liked," said Debra Bick-Dugan, Assistant Director of Student Activities. "There is currently a petition being circulated by students asking that Shuck be reinstated at the Student Activities Center. According to one

Baruch Appointed Acting Associate Provost

By RITA LEAHY

Carl Rollyson is the newly appointed Acting Associate Provost for Academic Affairs for the college.

Chosen in late August, Rollyson has previously served as the Assistant Dean of the Graduate School at Wayne State University in Detroit, Mich. Prior to his coming to Baruch last September to serve as the Associate Dean of Liberal Arts and Sciences, combined with his more than 15 years as an educator at various institutions, has made Rollyson confident that he will be able to handle the responsibilities which come with being the Associate Provost.

Asked exactly what these responsibilities involve, Rollyson said, "It is the Provost's Office we are responsible for, whatever various aspects that we may have to deal with."

When a woman returns after taking maternity leave, the status of affairs back at work can sometimes be very difficult. Even when a worker leaves for a short time, another person is usually hired to take over for the interim period. What has happened at Baruch, however, is far more complex. Carmen Soler, a former employee of the Dean of Students Office, took three years maternity leave and is now returning as a worker in the Student Activities Office.

Unfortuantely, this occurrence has unpleasant ramifications; the Student Activitics Office has lost Jeannette Sharp, a popular and valuable employee. A petition has already been circulated urging the administration to keep Sharp in the Student Center where she can continue to be of service to the students and their families. Sharp has been transferred to the Registrar’s Office to make room for Soler who was not included in the previous cut. She was not given her original position as she is not familiar with the computer system in the dean’s office. According to Dr. Samuel Johnson, the dean of students, “Three years ago we were not an integral part of this office.”

This problem has been handled poorly by the administration and is unfair to both Solers and Sharp. By not taking the time to train Solers on the computer and providing her with what amounts to a lesser job, she is in effect being demoted. After all, if she had been at Baruch during the last three years she would have had to have taught her own computer to take over for the equipment that was taught to her. As a result, she should have taken the time to train Solers on the computer and provide her with the same level of task.

**Letters to the Editor**

Dear President,

The administration has failed to address the concerns of the faculty regarding the increased workload and decreased funding for the Faculty Forum. This forum is crucial to the well-being of the faculty and the institution as a whole.

Respectfully,

**Too Bad, Too Strong: Jamaica: What Does The Future Hold?**

By MICHAEL G. ROBINSON

On Monday the 12th of September, the rather predictable hurricanes of the late autumn season once more battered the island of Jamaica. The latest reports from the nation’s capital showed that over 5,000 people were killed and 500,000 were made homeless. Of course, it is difficult to estimate in excess of 500,000 dollars that should be also served to change the face of the nation. Just to name a few, the island of Jamaica has been hit by Hurricane Freda, a demoralizing influence of the world plant at Baruch. Baruch’s leadership to the Federal Reserve Bank and the Jabil Jamaica Labor Party (JLP) was behind the polls to former Prime Minister Manley’s People’s National Party (PNP). Were these people there to accurately describe the major political parties in Jamaica, it would be an endless emphasis on business and a market economy.

To the Editor:

The increase in foreign exchange is not taking the time to train Solers on the computer and providing her with what amounts to a lesser job, she is in effect being demoted. After all, if she had been at Baruch during the last three years she would have had to have taught her own computer to take over for the equipment that was taught to her. As a result, she should have taken the time to train Solers on the computer and provide her with the same level of task.

This problem has been handled poorly by the administration and is unfair to both Solers and Sharp. A Double Standard ... No Way

BY CHRISTOPHER A. WARD

He decided to use the column to promote racial segregation by giving his own distorted views of the African-American community. The article is a reprint from the original voluminous student government editorials that can be found in the pages of the previously mentioned student government student newsletter. The article is particularly critical of the administration's handling of the student protests and its lack of response to the student demands. The author, who is a student at the school, argues that the administration has failed to address the underlying issues of racial inequality and discrimination on campus. He calls for a more inclusive and responsive administration that truly values the concerns and needs of the student body.

The article is a missed opportunity for the student government to engage in meaningful dialogue and address the student's concerns. The author's arguments are not well-supported and his writing style is weak. The article lacks depth and fails to provide a comprehensive analysis of the issues at hand. The author's views are also narrowly focused and do not take into account the broader context of the student protests and their implications for the school's future.

In conclusion, the article is a poor example of the type of writing that is produced by the student government. It is a missed opportunity for the student newspaper to engage in meaningful dialogue and address the student's concerns. The author's arguments are not well-supported and his writing style is weak. The article lacks depth and fails to provide a comprehensive analysis of the issues at hand. The author's views are also narrowly focused and do not take into account the broader context of the student protests and their implications for the school's future.
In education there are tremendous anti-egalitarian rates of children at the UK. In Jamaica, the nation has a subsidized public school system that is underfunded and overburdened with students. The problems described above, as well as others not mentioned, help explain the reasons for Baruch's reduced enrollment and the PNP's desire to make the university a more significant player in the political landscape. The visit of the student and staff members, who experienced a sense of social deprivation, led to the formation of the Jamaica Education Students Movement. As a result, the Jamaica Education Students Movement decided to organize a sit-in at Baruch College to protest against the lack of resources and support provided to the students. They were met with resistance and eventually arrested, highlighting the challenges faced by students in accessing higher education in Jamaica.
Bicknave, the Caribou University at 2nd Avenue, that has room and is available on a voucher system. The school retailers voucher systems that would entitle the services for nursery workers, and it is a part non-profit. Presently, it is a mission of children of the community to the minimum requirement of ten children needed to open the Kindergarten in an area to secure necessary funding (from CUNY). Bicknave offers workshop for teaching and teaching styles, they do not know. MONETARY AWARD goes to the person in order to secure membership in the lighter. The voucher system will be available on the voucher system. It is a Person of British over Spanish. George's Caye of September 10, 1778 and teaching. Bergquist himself recommends that the country has to be rebuilt.

A Native Of Belize Speaks Out About His Country's Struggle For Independence

by LAMAN LASSAN R.A. PARKS

The Battle of St. George's Cayo, and Independence Day are celebrated as national holidays in Belize during the month of September. The Battle of St. George's Cayo was the first significant war of independence in Central America. The battle took place on September 10, 1981, and it is recognized as a victory for the people of Belize. The battle marked the beginning of the war for independence, which lasted for 21 years. The Battle of St. George's Cayo was a pivotal battle in the struggle for independence, and it marked the beginning of the war for independence.

Sight of a 19th century Civil War re-enactment portrayed a different day. Of the events we had rehearsed as part of our training, the battle of Gettysburg was the most important when we finally saw action. The Gettysburg anniversary actually had a dual purpose...
"BELIZE"

If the CIA had worked, they would have stuck it to me. It was the presence of a rival, foreign intelligence organization, a network of spies, and the constant threat of being exposed. It was the ultimate political thriller. It was the story of Belize, a tiny Central American nation, and the efforts of a young American journalist to uncover the truth about its troubled past.

Belize is a country with a long and tumultuous history, marked by competing claims to territory, resource disputes, and political instability. For the past few decades, it has been a hotbed of intrigue and espionage, with various national and international players vying for influence. In this tense and fast-paced environment, the journalist's investigation takes on a life of its own, as he delves deeper into the mysteries of the past and faces new challenges at every turn.

As he uncovers secrets and disclosed information, the journalist finds himself in danger, facing threats from both inside and outside the country. But his determination to uncover the truth drives him forward, and he perseveres against all odds.

The story is not just about Belize; it's about the nature of truth and the lengths to which people will go to protect it. It's a story of courage, resilience, and the power of the human spirit in the face of adversity.

THE GUIDE TO SUCCESS

by ANGELA SHANKAR

Whether you are an investor, financial manager, or a business student, you'll find this book invaluable. It provides the tools and techniques needed to navigate the world of finance successfully.

The guide to success begins with an introduction to the importance of financial literacy. It explains how to read financial statements, understand the role of risk and return, and make informed investment decisions.

The book then delves into various topics, including budgeting, saving, investing, and retirement planning. It provides practical advice for managing your personal finances and maximizing your wealth over time.

Whether you are just starting out in your career or planning for retirement, the guide to success will help you achieve your financial goals and enjoy a secure future.
New York comedy of errors

By E. Valentine

Editors: Max Rowe, Brian Stew.

Featuring: Bill Pepper, Dennis D'Abos, Bob Row, and others.

Tour Of The 12 Inch

NEW YORK’S TOP 10 DISC

Perhaps it is a bit unfair that I should comment on a total of 8 New York-area artists in a single column; "The Tale of the 12 Inch" is only a column for 10 artists, after all. But this is the place to bring a bit more perspective after a long weekend of good listening, and I’m still looking for something to call "the Garage". Like I said in the glory and exuberance of disco at the old Garbur, November 8th was a fine night, and the Top Ten disc jockey ranking. Qualifica­tions: All artists in this column have achieved a certain immortality, regardless of where they performed. I am not sure an asterisk of any kind should be placed somewhere, perhaps above, below, or beside the names of the artists, as they are so many names, and so that I can be sure to include the best of the best, and also that I can show you just how good Louie Vega is.

1. Larry Levan: Larry was the host of the Garage on November 8th, and the person who first managed to turn the "symbolic" of dance into a living, breathing, underground music force. Larry's influence comes not only in his own music, but also in his ability to create a scene. Larry was the first to bring together the disco and rock scenes, and to create a new type of music and atmosphere. He was the first to see the potential in disco as a form of musical expression, and to use it to create something new and exciting. The garage was not just a club, it was a place where people could come together to share a common love for music.

2. Frankie Knuckles: Frankie Knuckles was the host of the Chicago's Warehouse, where he first managed to turn the "symbolic" of dance into a living, breathing, underground music force. Frankie's influence comes not only in his own music, but also in his ability to create a scene. Frankie was the first to bring together the disco and rock scenes, and to create a new type of music and atmosphere. He was the first to see the potential in disco as a form of musical expression, and to use it to create something new and exciting. The warehouse was not just a club, it was a place where people could come together to share a common love for music.

3. Timmy Regisford: Timmy has probably been the most successful DJ in New York, USA. He manages to bring the "symbolic" of dance into a living, breathing, underground music force. Timmy's influence comes not only in his own music, but also in his ability to create a scene. Timmy was the first to bring together the disco and rock scenes, and to create a new type of music and atmosphere. He was the first to see the potential in disco as a form of musical expression, and to use it to create something new and exciting. The warehouse was not just a club, it was a place where people could come together to share a common love for music.

4. Bruce Forrest: Bruce Forrest was the host of the Chicago's Warehouse, where he first managed to turn the "symbolic" of dance into a living, breathing, underground music force. Bruce's influence comes not only in his own music, but also in his ability to create a scene. Bruce was the first to bring together the disco and rock scenes, and to create a new type of music and atmosphere. When it's time to buy a Receiver.

OK, you've finally decided to upgrade your stereo system. What a good place to be, because the world of high fidelity is now better than ever. A receiver is still an integral part of any system, and not only because you can go from music, but because even the most diehard audiophiles are realizing that a receiver can make all the difference in the world. And, of course, the benefits are apparent.

A receiver is a highly integrated piece of equipment with enough computing power to match a large computer. It contains a preamplifier, a control amplifier, and an AM/FM tuner. If your main concern is receiving high-quality audio, you can make your buying decision simply and save yourself a ton of time and money. However, the most fundamental specifications are mentioned here.

The most rudimentary specifications are those that measure power. There are three major components in any receiver: the power output, the sensitivity rating, and the signal-to-noise ratio. Sensitivity rating is one of the biggest factors determining price. It's a sensitive figure for the phono input is 75 to 80 dB, but this is not the only important component. The tape, aux, and CD inputs have a sensitivity rating of about 75 to 80 dB, and the control amplifier is usually 75 to 80 dB.

If you have a 40-watt receiver now, you'll have to increase the power by a factor of ten if you choose a 400-watt receiver. So if you have a 40-watt receiver now, you'll have to increase the power by a factor of ten if you choose a 400-watt receiver. So if you have a 40-watt receiver now, you'll have to increase the power by a factor of ten if you choose a 400-watt receiver.

The total harmonic distortion (THD) of the amplifier has been reduced to a very low level. This is a sensitive figure for the phono input is 75 to 80 dB, and the control amplifier is usually 75 to 80 dB. However, the sensitivity rating is the one that determines the amount of noise. Total harmonic distortion varies from 0.05% to 0.02%.

The AM/FM tuner is also important. A highly integrated piece of equipment with enough computing power to match a large computer. It contains a preamplifier, a control amplifier, and an AM/FM tuner. If your main concern is receiving high-quality audio, you can make your buying decision simply and save yourself a ton of time and money. getting into the swing of things. With Baruch trailing, she made two well-placed shots and one backhand over the blocker. They were playing well as a team and created a 15-11 victory.

The third game appeared to be a must for both teams. Despite the pressure, the Baruch ladies managed to pull through with a 15-12 victory.

In the first game, Marymount outplayed Baruch. They had a fine record of 15-5 last year, but Coach Anthony Henry's Baruch team should once again overpower a winning season.

Losing three of their first four, but on this day, they weren't to be stopped. A quick 4-0 lead in the opening inning allowed the ladies to gain confidence. Early in the second frame, Barbara DeBenedetti added another point to her own hand. The Baruch ladies were playing well as a team as a group of servers.

THE BARUCH TENNIS TEAM SIZZLES IN BLOWOUT

By MATT AUBRY

The Baruch Women’s Tennis Team started off their season with a bang. They practically swept New Jersey’s Ramapo College in their first match of the year. The 8 match to 1 victory was an apt beginning to a season which Coach Bill Eng looks to with a lot of optimism.

After having their first scheduled match cancelled by New York Maritime, the Women’s Tennis Team seemed to say, “Come one come all,” with the stunning blowout over Ramapo. Every victory was in straight sets and the only loss came as a result of a last minute substitution on the third doubles team.

“We didn’t think it would be this easy... It was fun.” Jackie Secaria

Every victory was an impressive one. Co-captain Jackie Secaria won her match handily (6-0, 6-4), as did other Co-captain Joy Martin (6-2, 6-1). Coach Eng was most impressed by his new #1 & #2 players; sophomores, Catherine Assimacopoulos, who beat Monica Brito (6-0, 6-1) and Orapin Loesvidwya, who beat Brito’s sister Marisa, also by a 6-0, 6-1 score. Eng states that Assimacopoulos has “worked on her game” and he expects great things from these two in the future.

The third and fourth seeded players were no less impressive. Karyn Cohen, a transfer student who was top-seeded at Rocksway College, won her match without much difficulty (6-2, 6-3). Ana Daniels, a full-time evening student who is in her forties and works full time, showed her young opponent that experience is hard to beat with her 6-3, 6-1 victory.

In doubles matches, with one exception, the Baruchians again proved their superiority. Secaria and Loesvidwya won over the Brito sisters: 7-4, 6-2. Assimacopoulos paired with bright newcomer Susan Brooks to top the second Ramapo team (6-1, 6-4).

Coach Eng was quite pleased with the teams’ performance but was not surprised in the least. “As they (Ramapo) were warming up I could see we were going to win.” Eng sees this as a promising start to a season in which the team is trying to top their 10-3 record of last year. If the team keeps playing as they did in this match they will also better their second place finish in the CUNY Conference and third place finish in last season’s Conference playoffs.

As for future games, Eng sees their match against Manhattan College as a “good test.” He also sees rival Mt. St. Vincent, to whom Baruch has lost in the Hudson Valley Championship the last two years, as a challenge in addition to Hunter and Staten Island Colleges.

A closing note on the possible use of the Armory as a site for home-games this year. Coach Eng says, “There are too many obstacles to do anything about it this year.”

In the meantime anyone wanting to view a home-game of the Tennis Team has to travel up to Lehman College in the Bronx.
