Baruch Plans New Security System

New Ideas Mean Old I.D.s Are Out

By Eric Loyola

Sometimes in the Fall semester, Baruch students will receive new I.D. cards. "If we give someone a second chance to take a better picture," said one student, "the one I have now was taken almost five years ago. It looked better. But the predictions of the new cards going beyond that is premature.

The new card will not serve to verify identity, but will literally be the key to a new security system looming in the school's near future and will regulate student and faculty access to the campus.

The days of running to the guard are over. "It's the way of the future and we'll be the first in the whole university to have a system as sophisticated as this," said an enthusiastic Marilyn Mihalco, Director of Campus Planning.

Two and a half years of planning and hard work in conceiving with Susan Kislovoff, Director of the Administrative Computer Center and Associate Provost Barry Dunton and the security department have given fruit to a system complicated in its workings, but simpler in its use. Replacing the current I.D. with the information horizontally displayed will be a vertical card with a magnet on the back similar to the one found on a credit card. The user will run the card through the card reader installed on the turnstile. A light will instantly flash from green to red, indicating that the card is valid and entrance possible to the turnstile itself. And onward to the elevators and your first class. Tom Sedivy of Brooklyn-based Tomed Corp., a concern manufacturing turnstiles and other security gates, said, "It takes half a second to a second to go through depending on how much information is encoded on the magnet. Baruch's system should permit quick entry at the pace of 25 students per minute."

The hardware and brains of the system are on display at the International Security Conference East, a trade convention attended by members of the security industry, including Baruch's security director, Harry McGaughan and Campus Planning architect James Lefebvre. Lending assurance that the aesthetics of Baruch's lobbies would not suffer, McGaughan said, "We've been looking at the turnstiles by Tomed. They have a very sleek product and it looks good too.

Local Intelligence Network Expandable (LINC) Co. will provide the card readers and hardware for the computer system that will comprise each substation located adjacent to the turnstiles. Mihalco said, "We have worked out some procedures that if you don't have your card you can go to a terminal."

"The security guard whatever the substation can punch in your name or I.D. number into the terminal and your likeness will appear on the monitor. You'll be issued a temporary card for the day. "Technically it's known as a video imaging system," said Steve Braun of Lornox, the Durango, Colorado company that will provide the color monitors for the computer system.

"This whole thing evolved out of our design for site A," said Mihalco, referring to the construction and renovation of the building on 25th St. which will house the library among other facilities two years from now, the estimated time of completion. She continued, "We then became aware of the fact that Security System

Baruch College, CUNY

Matthew Goldstein Appointed President

By Rafael A. Olmeda, Jr.

The board of trustees of the City University of New York announced the appointment of Matthew Goldstein as president of Baruch College on June 5.

Goldstein succeeds Joel Segall, who resigned in one year ago amidst controversies about the deferral of accreditation of the College by the Middle States Association of Colleges and Schools and allegations of bias in Baruch's hiring practices. Goldstein, who served as president of the Baruch College Foundation of the City University of New York since 1985, was named to the position by trustees, effective September 4.

In the decade that Goldstein has been with Baruch, he led the Board of Regents of the City University of New York to substantial growth, including a more than doubling of student enrollments and an expansion of the Baruch campus east to the East River. Goldstein was named to the position of chancellor of CUNY in 1990, and in his short tenure at the head of the system he has initiated an academic renaissance, building collaborations in the arts and sciences, and fostering a strong community spirit.

The appointment of Matthew Goldstein is a historic moment for Baruch College, the largest of CUNY's four-year colleges. With a five-year commitment of $6 million to support the university's academic growth, Goldstein will be instrumental in defining the future of Baruch, the nation's largest public business school.

Goldstein's appointment is the result of a national search conducted by the University Chancellor's Office. The search was conducted by a committee of faculty, students and alumni who were selected by the University Chancellor's Office.

The search was conducted by a committee of faculty, students and alumni who were selected by the University Chancellor's Office.

A Derailment Delays Students on First Day

Accident leaves five dead and 260 injured

By Eric Loyola

The first five cars buckled and jackknifed straight across the two southbound tracks toppling 15 to 20 support beams. Investigators theorize that the force of the collision which brought them to a grinding stop was so strong that it caused the front car to split in two.

To the surprise of many of the personnel involved in the rescue efforts, which continued into the morning hours, the motorman who walked away from the crash dazed was apprehended at 12:10 a.m. Ray fell asleep suffered no more than 15 to 20 mph.

The train jumped a switch. Derailment Delays Students on First Day

The front car struck a giant cylinder. According to police, the cylinder was the factor which triggered 15 to 20 support beams. Investigators theorize that the force of the collision which brought them to a grinding stop was so strong that it caused the front car to split in two.

Baruch Students to Get New I.D. System

Continued from Page 1

The system will be implemented as a pilot program this fall and be made available to all students in the spring. It is expected to cost $1.5 million to implement and will be funded by a combination of university funds and grants. The pilot program will allow students to use their I.D. cards as a form of identification, access to certain university facilities, and access to public transportation. The system is expected to be fully operational by the fall of 1998.

The new I.D. cards will be issued to all students on a voluntary basis. Students who choose to participate will be able to access the following services:

- Access to the university's computer network
- Access to the university's library
- Access to the university's cafeteria
- Access to the university's bookstore
- Access to the university's recreation facilities

The new I.D. cards will be designed to look like credit cards and will contain a magnetic stripe and a chip. The chip will contain information about the student's academic record, financial aid, and other personal information. The magnetic stripe will contain information about the student's photo identification and other personal information.

The university is currently working with a number of vendors to select the best I.D. card for its students. The university is also working with the New York City Metropolitan Transportation Authority to ensure that the new I.D. cards will be accepted on public transportation.

Matt Goldstein's Challenge-And Ours

After a national search, the board of trustees of the City University of New York has chosen Matthew Goldstein, a highly-qualified administrator and statistician, to lead Baruch College. The days of Joel Bregnan are behind us, as are the days of Joyce F. Brown, who served as acting president during the past week.

Goldstein comes to the helm of a college that is an oasis in an urban desert. At Baruch College, no matter who you are and no matter what your background is, you will be treated fairly and equally by caring, sensitive faculty and administration. The support services and facilities that are available to your students are some of the best in the country. They have been helped thereby. It's an easy job.

But let's serve Goldstein the same b.s. that his predecessors tried to feed us. Let's not make him feel that he is in the same situation as we have been. We cannot allow a privileged few students to speak for the majority. What we must do is let Goldstein know, publicly, what we need to do. To a certain extent this task is the responsibility of the city government and the student media. But others are spreading a bad image. At Baruch, others feel that there is no support, they feel that there are not enough students or faculty, they feel that they are being treated unfairly. They could have been treated differently. But let's not serve Goldstein the same shtick.

We have been here before. We have a long history of waiting for the administration to do something about it. But let's not allow this to happen again. We cannot allow a privileged few students to speak for the majority. What we must do is let Goldstein know, publicly, what we need to do. To a certain extent this task is the responsibility of the city government and the student media. But others are spreading a bad image. At Baruch, others feel that there is no support, they feel that there are not enough students or faculty, they feel that they are being treated unfairly. They could have been treated differently. But let's not serve Goldstein the same shtick.

How Can We Achieve Peace In Crown Heights?

Recent events in the Crown Heights section of Brooklyn have highlighted racial violence in New York City once again. The community is once again facing headlines with its courage, demanding the prosecution of the Hasidic driver who struck and killed young Gavin Cato.

The Jewish community is equally outraged at the murder of Yankel Rosenbaum, who was stabbed to death by two blacks during the race that ended in the fatal accident. Black and white organizations, Cato's family, and the Jewish community now cry out for peace, but how? What issues are to be addressed, and who should address them?

The Ticker wonders if the community can achieve peace in Crown Heights. Just drop a letter to us at the address below. We will print your responses in a special section. Whether you're a student, administrator, or stereotype, stop the violence now and suddenly find yourself in this lap by divine intervention, we care about what you think.

Let us know.

The Revolutionary Movement

Counting Down to the Year 2000

By Newton Bracken

The last year of the century is here. It is the centennial of woman's suffrage, and the centennial of the Great Depression. The memory of the past century is a reminder that the future is not a given. It is a time to remember the struggles of the past, and to be inspired by the lessons of history.

Jaffies and Anti-Semitism

Continued from Page 11

We are born into a world of suffering and conflict. The history of our people is a testament to the challenges we have faced. It is a story of resilience and strength, of struggle and triumph.

Jeffries and African-American Rhodes Scholars

It seems to be agreed that certain political decisions are to blame for the current state of affairs. However, there are other factors at play as well. One such factor is anti-Semitism.

The Children in Turmoil

This article explores the root causes of the current turmoil and offers a way forward. It is hoped that this will be a starting point for further discussion and action.

Baruch's Employment Department Chair Appalala City College Professor's Scholarship

The following is the transcript of an interview with Donald H. Smith, chairman of the Employment Department at Baruch College, and the recent controversy surrounding the comments made by Leonard Jeffries, professor of Black Studies at City College. Jeffries' July 20 speech at the Empire State Black Arts and Culture Festival in Albany has drawn criticism and charges that he is anti-Semitic. The interview was conducted by Rafael Olmeda, a reporter of The New York City.

Rafael Olmeda, Jr.

I think that's one of the biggest questions. They can't enjoy the natural beauty of the world because they've been raised to think the world is a closed society. They can't enjoy the beauty of nature because they've been raised to think that nature is a closed society.

The final hour is dark in the minds of women and men and cages of all the animals, and the final hour as we now experience it. The final hour is the hour of the Lion, the hour of the Beast.

The final hour is dark in the minds of women and men and cages of all the animals, and the final hour as we now experience it. The final hour is the hour of the Lion, the hour of the Beast.
D.S.: Yes, it's a theory. As Diane Ravitch has sometimes said, he isn't very influential. She has said that her book on the history of mathematics is not so well known. That's because it was published in 1986, the year before he wrote his book. His book has been more widely read, but it's not as influential as hers. She has said that she doesn't think he's a very important figure in the history of mathematics. That's understandable, I suppose, but I don't agree with her. I think he's a very important figure in the history of mathematics. His book is well written and clear, and it's a good introduction to the subject. It's not as influential as hers, but it's still important.

R.O.: I've read some of his work, and I think it's very good. His book on the history of mathematics is well written and clear. It's a good introduction to the subject. I think it's important that we have books like his, even if they're not as influential as hers. I think she's right to say that hers is more widely read, but I think she's wrong to say that he's not very influential. He's a very important figure in the history of mathematics. His book is well written and clear, and it's a good introduction to the subject. It's not as influential as hers, but it's still important.

D.S.: Yes, I agree. I think he's a very important figure in the history of mathematics. His book is well written and clear, and it's a good introduction to the subject. It's not as influential as hers, but it's still important. I think she's right to say that hers is more widely read, but I think she's wrong to say that he's not very influential. The Sound of Melted Metal

The first article of each section always presents me with somewhat of a problem. Specifically, what is worth mentioning? This section is no different, in fact, it's even worse. There were so many musical highlights this summer that I couldn't choose just one. Among others Heavy D manages to pull off a new twist on a pretty well-worn musical style. If you've ever seen anybody play the saxophone in a marching band you'll recognize this. But Heavy D manages to make it interesting. A lot of people who would be listening to this track feel a little left out in the cold. I mean there are plenty of saxophone players out there, but the way Heavy D manages to make it interesting stands out.

For those of you who own a saxophone, you may be interested in this. I see no reason why you can't do this to your own instrument. The only thing I would change is the way it's presented. I don't know if this is the best way to present a saxophone solo. But Heavy D manages to make it interesting. A lot of people who would be listening to this track feel a little left out in the cold. I mean there are plenty of saxophone players out there, but the way Heavy D manages to make it interesting stands out.

Now that the summer is coming to an end, the most logical progression would be to take a look at the new albums that are being released in the heating of the television season. On September 5th an album titled “The Sound of Melted Metal” was released. Along with their three live albums, “The Sound of Melted Metal” and “The Story of the Band,” they also released a new album titled “The Sound of Melted Metal.” The album itself is a collection of the band’s earliest recordings. It is a fitting tribute to the band’s early days, and it is a reminder of what they did.

Other albums released this week include: “Rage Against the Machine” with Rage Against the Machine, “The Story of the Band” with Metallica, and “The Sound of Melted Metal” with the band’s other side project, “Rage Against the Machine.” “The Sound of Melted Metal” is a collection of the band’s earliest recordings. It is a fitting tribute to the band’s early days, and it is a reminder of what they did. "Rage Against the Machine" is a collection of the band’s earliest recordings. It is a fitting tribute to the band’s early days, and it is a reminder of what they did.

The Sound of Melted Metal

The sound of metal has never been more present on this album. Old Breed and Black Sabbath are among the many that have contributed to this album. The band’s music is a true testament to their influence. The band’s music is a true testament to their influence. The band’s music is a true testament to their influence.

STANLEY H. KAPLAN
Take Kaplan Or Take Your Chances
Canarsie: Prelude to Crown Heights

By Eric Loyo

On Saturday, Aug. 10, race wasn't the only barrier that stood between the predominantly white residents of Canarsie, who had come out of their homes and onto their streets and lawns to exercise their constitutionally protected right to race, just as the 450 marchers had come to exercise their right to peaceful assembly and to exercise their legal right to protest testing acts of unwavering specificity and hate against minorities. In the end, the spectators and nativists, many who taunted and waved the American flag, others who sought to dramatize their perceptions of Afro-American dirty and bystanders from hurling epithets that would make all four sides were rate baxes of Ronzoni sauce sufficient to deter skinheads from staging a protest.

A young, bearded youth held a watermelon on high out the back of the truck, tantalizing white spectators and taunting the marchers who chased the truck down Foster Ave. hoping to speak with the passengers. They would get their chance later.

About Demographics and Fear

Protesters Danny Payne wore a T-shirt that read, "Do You Know Racism" and carried a sign that further provoked the residents. ``The Devil." Whites and blacks from Canarsie were equally divided in their opinions of the march and its leader as they were about the issues that prompted it. Said one Beruch student who watched the march from his yard, "I've got nothing against the blacks that I know; it's the ones that I don't why scare me and my family. They come over from Brownsville and fuck this place up. They're the ones who give blacks here a bad name." Nearby, a woman handed out pamphlets for the Populist Party, which works to legitimize that cause of white supremacists." Inspector Michaelr Krogler, of those interviewed, one of the few to give his name, said, then still undergoing repairs for fire damage, and back to the precinct and the buses waiting in the parking area across from it. Canarsie which was 80 percent white in 1980 is today 25 percent "other." The Fillmore, which roared too.

To Media: Get It Right; To Sharpton: Stay Out

In 1975, Joseph Elias, a white parent and local school board official, supported a zoning plan to integrate junior high schools in Canarsie's District 18. For his troubles, in March of the same year, his home was firebombed. In 1980, a black couple, Wilfred and Agnis Phillip, after years of surviving, finally bought a home on East 91st Street. It too was torched. Citing 35 years of racial harmony, Blackburn explained the incident to show its "good cooperation between different ethnic groups by participating in planned neighborhood demonstrations." These demonstrations are forthcoming, as of this writing.

At one point in the meeting, Eyewitness News reporter Rolanda Watts videotaped the group. Rose Thaler, president of the tenant association, delayed her request at first but reconsidered, feeling they could get the media to work in their favor by showing cooperation between blacks and whites. When Watts was asked of the future of the area, Thaler said, "It read, 'The White Man Is The Victim.'" She was to blacks.

Exactly two weeks later in next week. Although, the protests to blacks. According to theHandleman's report, Sharpton's full efforts were to be made.

A resident of the houses, Haddie Brooks, asked some of the reporters present, "Before any other march, I want to tell you the community shouldn't they ask the people 'Who' If they want a march, if they feel a march would hurt or help the community"? She added, "We believe we don't need to bring in five busloads of people. They stir up trouble and leave. They don't live here. We do and we don't need to blow this place up." Sharpton, who organized marches in Bensonhurst after the murder of black teenager Yusef Hawkins, said the neighborhood's response was "worse than Bensonhurst." Exactly two weeks later in Crown Heights, a march at the march's end of four nights of rioting sparked by the death of a seven-year-old Gavin Cato killed by a car driven by a Hasidic jew, with more than twice the number of demonstrators as prior ones, was relatively peaceful, though the peace was deemed temporary and possible only because of the Sabbath observed by the Hasidim.

Reporters finally caught up to Joey Lawrence who was last seen as a dumpster holding a watermelon. He and his friends from the black Chevy quickly ate the evidence as the cops closed in. "They're going to insult white people I'm going to insult right back," he said, gesturing with his fist to their mouths.

Friendly Rev. Al Sharpton being led to his sedan after protest.
Getting on the Corporate Fast Track Starts Here!

The National Black MBA Association Annual Student Conference and Career Fair
September 29-30, 1991
Marriott Hotel
New York

A unique career opportunity too exciting to miss... and it's free!

For more information, call the National Black MBA Association Conference Line at (312) 245-1370.

totally, the success of America's favorite superheroes and the happiness of their fans.

The Golden Age of comics was also an era when many superheroes first appeared, including Superman, Batman, Spiderman, and the Sandman. The industry was booming, and the demand for talented artists was high.

The story of how a comic book company is created and the challenges faced by the creators is truly inspiring. The dedication and hard work of artists, writers, and publishers are evident in every page of this article.

The article also highlights the importance of diversity in the comic book industry. The increase in the number of minority creators and the growing awareness of the need for more representation is a testament to the progress made in recent years.

Overall, this article provides a fascinating glimpse into the history of the comic book industry and its impact on popular culture. It is a must-read for anyone interested in the history of comics.

The World Series Race: Who's Going and Why

By Joseph Sepcaru

The signs that summer is clearly setting in are everywhere. The fall学期 is getting shorter, school is beginning, football season has arrived and the baseball playoffs are heating up. Well, call your buddies and plan your bets, here are the three divisional winners.

American League East: The Toronto Blue Jays are far and away the class of this division even though they haven't performed like it. Regardless of their various off-season woes, pitcher will pull them through to the championship. If there is anything to the old adage, "Pitching is 80% of the game," the Blue Jays will win without a doubt. With the rise of the staff, Dave Stieb out for the year, the key midseason acquisition of Tom Candiotti, from Cleveland, makes this free staff one of baseball's best. Despite your season from Kelly Gruber and Joe Carter, they will still muster up enough offense to win the division. Detroit will hang tough, however, their powerful offense won't be able to overcome their neighbors to the north. The Boston Red Sox, with Roger "the Rocket" Clemens, just don't have enough. Everyone else in this division forget it.

American League West: The Minnesota Twins will win this division, for now anyway. In a very talented division, the Twins have exploded the most. So far, they've taken the A.L. West title. Kelly's crew is playing the most inspired ball, by far. Kelly seeks to soar with the A.L. championship and has put all the right buttons on this over achieving club. They have a great pitching staff led by possible Cy Young winner Bert Blyleven. Rookie sensation, current basemate Chuck Knoblauch, and future Mets pitcher Rick Aguilera, new to the Twins relief are, also give them a big edge. Nobody else in this division will even come close.

National League West: Surprise! Surprise! The winner here will be the Atlanta Braves. The youth of the Braves will prevail over the experiences of Tommy Lasorda and the Strawberries of L.A. Dodgers. The Braves have a very exciting future in store. They have man- nerly coached a blend of experience to their team with the off-season acquisition of third baseman Terry Pendleton and first baseman Sid Bream. Pendleton was a free agent that nobody wanted, Atlanta took a chance which has paid off great dividends, a strong candidate for MVP.

Atlanta's Cinderella season will come to a screeching halt if the NLCS. Pittsburgh will win in five games.

The Minnesota Twins will sweep by the Toronto Blue Jays in a series that can possibly go seven games.

Finally, the 1991 World Series Champions will be the Pittsburgh Pirates. This will be a good series, at least better than last year. Living in New York, this last year, we'll care.
WORK SMARTER.
NOT HARDER.

We're working smarter, too. So you don't have to work harder.

For us, it means an ongoing relationship with educators and professors, striving to understand what's needed to help them make math concepts come alive.

It means continually working with students like you, discovering firsthand what you expect from the calculator you select.

The result? Calculators that are highly recommended by your teachers and peers. Calculators that are perfectly matched to your major and your coursework.

The TI-81 is a perfect example. It offers the most comprehensive, easy-to-use graphing features available with extensive programming capabilities.

And there are others.

Like the TI-68, an advanced scientific that solves up to five simultaneous equations, performs complex numbers and offers formula programming.

Plus a whole lot more.

No matter what your major, no matter what the course, there's a TI scientific or business calculator that's right for you. Do the smart thing: make one of them a part of your professional personality now, and for the years to come.

You'll be on your way to working smarter. Instead of harder.

Try the entire line of TI scientific and business calculators at your local TI retailer.

The TI-36X SOLAR, a general purpose workhorse powered by ANYLITE solar cells so you never need batteries.

The BA II PLUS. For business students, this is the one to get. It handles time-value-of-money and offers cash flow analysis for internal rate of return (IRR) and net present value (NPV).

$50 MAIL-IN REBATE
when you buy the TI-68 or BAII PLUS™

TERMS AND CONDITIONS: This offer valid for purchases between 11/91 and 11/31/91.

1. Save your original cash register receipt.
2. Clip the proof-of-purchase UPC bar code from package.
3. Complete this mail-in rebate certificate.
4. Send all three items to the address below.
