Goldstein Visits Student Center After Freshman Convocation

By Eric Loya

His administration only four days old, Baruch's president accomplished two firsts on Thursday, Sept. 5. After delivering his first public address to the freshman class, Matthew Goldstein went on an impromptu tour of the Student Center, something which one administrator said a Baruch president had not done in thirteen years.

Goldstein provided the concluding remarks for the convocation—the school's official welcome to the entering class. "I'm delighted to be with you today and I want to extend my warmest welcome to you, as new members of the Baruch family," said the president and former Baruch student. He continued, "For me, it is a wonderful homecoming—and it's an auspicious beginning for you."

Freshman Yiing Chen said, "He seemed like a nice guy and I think that didn't give us a 30 minute speech and just said what he had to.""To an audience who could empathize with the situation, an alumna from the class of '91, Abe Eisenstat related his "first day" experience. The night before his first day of classes his parents came into my room in one of those misty-eyed parent-son bonding moments. They gave me a beautiful set of pens, which I subsequently lost, and a big, big brown briefcase that my father informed me at the time was going to be for law school." When the laughter subsided Eisenstat continued, "My first class was at 8:15 in the morning, Business 1000 in this same auditorium. I was there at 7:30 and I took a seat and waited and waited and waited. Come 8:15 and I was still the only one there, so I jumped out of my seat, ran up the isle, accosted the security guard in the lobby and asked him in a voice reminiscent of the Terminator, 'Where's my Business 1000 class?' He concluded by saying that the guard looked at him askew and informed him that classes didn't start until the next day.

About the reception held in the Administrative Lounge, Goldstein said, "The reception was terrific. I got to meet a number of the students who were very gracious in coming up to me and wishing me well." Afterwards, Goldstein, accompanied by Vice President John Fisher, Director of Admissions, and Chair of the Student Senate Carl Aylman toured the Student Center shortly after club hours. He surprised a few lingering students as well as several school officials who had not seen a chief academic officer of the school visit the hub of student extra-curricular activity. Said one official who wished to remain nameless, "You just don't expect the president of the school to go to the Student Center unless the students take over the building or something.

When informed of the official's comments Goldstein said, "I find that surprising." Goldstein felt that a pre-existing problem needn't be a requisite for the president to take an interest in the activities of the students he has been appointed to serve. "It was a joyful experience to see the students having fun and relaxing. The president is not the only person who is disappointed about some of what he saw. "There is a lot of academic advice that the facilities are really so poor as they are." He continued, "I look forward to the day on which campus is being constructed so that the facilities will be more meaningful for gatherings and other events."

As he toured the floors Goldstein reminisced about his days as a student when City College and Baruch were one school. "What's interesting is that I walked into one of the rooms and I projected back to 1962. I remembered President Kennedy was on television talking about the Cuban misa"

Window Repairs Slated For This Month

By Rafael A. Martinez

The renovation of 33 sealed pivot windows located in the Student Center will begin in late October. The repair work will cost "a shade under 20,000 dollars and be funded by the City University of New York," said Alphonse Zatorski, the associate director of rehabilitation and construction for Campus Planning.

The pivot windows were sealed and installed for weatherization after one of them fell out of its frame on the third floor and crashed to the street on Sept. 27, 1990.

"The main problem in fixing the windows was obtaining funding, especially with the present fiscal crisis that the entire university is suffering. It's difficult to get funding from CUNY," stated Zatorski. Another problem in having the window repaired was in obtaining the proper gaskets, which serve as insulation, that fit the window according to Zatorski.

Leiday Paredes, the president of the Latin American Student Organization, stated, "Last year, especially in the Spring not being able to open a window was a real headache, all the club members wanted to hang out outside because the room was to hot." Paredes informed that the windows would be fixed, said, "It will be great, it will be cold soon but rooms get very hot and the members don't want to be there because it's so hot and hang out in other clubs." She added, "If the windows were fixed, even though cold, the members would come back because they can open the window and will feel more at home."

Carl Aylman, the director of Student Life, who is in the Student Center stated, "It is unbearable warm in the building with the windows shut and the discomfort level is very high." Aylman stated that the heat brought on occasional student discipline problems such as the smashing of the third floor ladies room window. "The repairing of the windows will make the student center more comfortable for everybody," stated Aylman.

The window repairs should be completed by late October said Zatorski.

Baruch Gets Funds For Freshmen

By Farah Gehy

Effective as of this term Baruch College will receive a new $150,000 grant from the New York City University. The money is to be used for freshmen in students and staff affairs.

Baruch College can no longer support students and staff for faculty so that they may become more self-sufficient in their daily lives. The money will be used to develop a new program to help students and staff get the money they need to live on a daily basis.

Baruch College will receive $150,000 to help students and staff get the money they need to live on a daily basis. The money will be used to develop a new program to help students and staff get the money they need to live on a daily basis.

Live By the Rules Or Change Them

Rules are funny little things. They are usually set up to protect the power-poor from the power-rich. Rules when obeyed help to provide everyone with a fair chance at advancing their own cause. When they are regarded only as lines on paper or just ignored completely we take the step toward disorder. Lavenda Davis, the president of the Day Student Student Government, has taken that step by declaring herself the Baruch delegate to the University Student Senate. In appointing herself the US Senate she has violated the DSSG Constitution, as DSSG does not supersede the DSSG Constitution, as DSSG constitution which gives the position to the University Student Senate. In appointing herself the USS delegate she has violated the rules that the University Senate. In appointing herself the USS delegate she has violated the rules that the University Senate.
Brainstorming With Ben

Destroying What Was to Make What Will Never Be

By Ben Lee

In today's world, there was a big bang about 4 billion years ago. The universe was so chaotic that many scientists believe it was impossible for life to emerge from such a state. However, the Big Bang theory suggests that the universe began from a single point and has been expanding ever since.

As the universe expanded, the temperature dropped, and the first simple life forms emerged. These early life forms were able to survive in the harsh conditions because they were adapted to the environment they lived in. Over time, these life forms evolved into more complex organisms, eventually leading to the development of humans.

The human species has a long and complex history, with many changes and adaptations over time. From the early hominids to the modern humans we are today, the evolution of the human species has been shaped by a variety of factors, including environmental changes, social interactions, and cultural developments.

It is fascinating to think about how far we have come as a species. From our earliest ancestors to the advanced technology we have today, the evolution of human beings is a testament to the power of adaptation and resilience.

Bud Lee's Triumph

At the Editors

Writer, director, Spike Lee seemed to always get rave reviews from anyone who had seen his works. He would even go on completely different ends of the social ladder. The end of the "crackheads" comedy was typical of that lifestyle.

The character of the "crackhead" as flipper's brother. This al

Despite the societal ignorance we all know about. This, I believe was no accident because Lee has proven to be a brilliant writer whose work is known across the globe. He has a way of telling his stories that makes you feel as though you are right there in the moment.

On the Club Tip...""
Video Saved

The Radio Star

It was ten years ago that Americans stopped turning on their radios. On January 1, 1990, listeners donated the favorities' last single or even to catch an advertisement about what was happening in the music to schools. It was ten years ago that the music industry was in a downward spiral. Sales were down, particularly for albums rather than singles. Radio seemed too boring to listen to the radio anymore. Hard rock had become so popular that people were on the move and radio was not.

Enter the hero of this story, Max. They introduced the Walkman way back in 1981. Since then, Walkman sales have increased 150%, and Walkman is now the leading brand. But not all is as it seems.

In defense of the music industry, the most popular music station during the 1980s was
the one that played the music video MTV was born. Well, now that America had two more great new mediums in which to enjoy music all the time, and the new wave station was sure to be all the rage all over America.

Thanks to VH1 and Hard Rock Cafe, the new wave station was sure to be all the rage all over America. 

In other words, even MTV Europe worked, because MTV in Japan and now MTV in making plans to air in Russia.

Now And Later

By Wesley Smith

Hangin Out In The Hood

It's a beautiful day in the neighborhood. It's a beautiful day for a neighbor, won't you see me? You've had that thought before, haven't you? This is a soundtrack on a pickup truck which could be something quite possible and a neighbor. Adriance is the number one Adriance the number of that reunion. Thus giving a message to Hollywood executives who have been reluctant to produce movies dealing with the African-American community in realistic terms.

The Music From The Motion Picture Boys In The Hood created just the right atmosphere for the viewers in the movie. Each cut on the album has just the right feel to it that brings you into a world where you can feel as if you are part of the movie. The songs are catchy and the lyrics are relevant to the times.

The only way to describe the album is that it is a well-tailored silk suit created specifically for one evening but picked this cut above all the rest because it's not only funky but it captures one of the main themes in the movie, the treatment African-Americans receive from those who are supposed to serve and protect the citizens (five-o, pigs, bureaucrats). Finally, we get to see them, hear them, understand them, yes; finally, we get to see the truth.

Another major accomplishment about the movie. If you haven't seen it, try it. Clarke is able to share my favorite. A few minutes that you listen to the main theme song from the movie, you'll feel the solidly smooth flowing cut through your blood tingle, Stanley Clarke is able to take you up to a new level. Clarke is able to bring you into a world where you can feel as if you are part of the movie.

The American influence and become a part of the world's music scene. The band's sound has a nice tribal feel to it. Songs such as "Remember" epitomizes this. The music at times sounds beyond the potential of music groups. They have a style all their own if they choose to fine tune it. They do have the style of "White Boys in the Jungle." A little originality in music is brought across, at times, seems faulty. In other words, Tribe is not a group that is brought across, at times, seems faulty.

Marvel at This
By Lenny Vigliotti

Have you checked out the current comic book price guides lately? Well, you may have reason to be shocked to find out that buying a Silver Age book like Ghost Rider #7, Volume 1, No. 1, from 1968 is already valued at $30. So look out, comic book investors, the Silver Age has started to appreciate. The reason for this is simply that the comic book industry is approaching a new height in sales and distribution. The number of comic book enthusiasts of all ages has increased significantly over the last 10 years, and it's not just the kids who are buying comics anymore. The adult market is growing, and this is causing a bidding war for older comic books.

The Silver Age, which lasted from 1956 to 1970, is considered to be the golden age of comic books. It was a time when comic book publishers started to take their product more seriously and began to create more complex storylines. Some of the most iconic comic book series of all time, such as The Fantastic Four, The Amazing Spider-Man, and The X-Men, were created during this time. These books were not only enjoyed by children but also by adults, who were beginning to appreciate the artistry and storytelling involved in comic books.

The Silver Age lasted until 1970, and then the Bronze Age began. This was a time when the comic book industry began to focus on creating more realistic stories and more diverse characters. The Bronze Age was a time of experimentation and growth for the comic book industry, and it is considered to be a time when the industry started to mature.

Now, the Silver Age is starting to appreciate in value. This is because the comics from this era are not only enjoying a resurgence of popularity but are also being rediscovered by a new generation of comic book enthusiasts. The price of a Silver Age book like Ghost Rider #7, Volume 1, No. 1, from 1968 is already valued at $30. So look out, comic book investors, the Silver Age has started to appreciate.

The Silver Age is not the only comic book era that is starting to appreciate in value. The Bronze Age is also starting to appreciate, with some books from this era already valued at $50. This is because the comics from this era are not only enjoying a resurgence of popularity but are also being rediscovered by a new generation of comic book enthusiasts.

So, if you have any Silver Age or Bronze Age comic books, now is the time to sell them. The value of these books is increasing, and this is a great opportunity to make some money. If you have any questions about the value of your comic books, you can consult a comic book price guide or speak to a professional comic book appraiser. The value of your comic books will depend on a variety of factors, including the condition of the book, the rarity of the issue, and the demand for the series.

In conclusion, the comic book industry is starting to appreciate in value, and this is great news for comic book enthusiasts. If you have any comic books, now is the time to sell them. The value of these books is increasing, and this is a great opportunity to make some money.
WORK SMARTER, NOT HARDER

Baruch Tops Old Westbury
Barrows’ Grand Slam Boosts Team

By Eric Grossman

"We’ll get them next year." For ages this statement was made by Baruch players at the end of dismal seasons. While most students shaking off summer fever, the baseball team is practicing and preparing for their fall baseball season.

Third year coach Dan "Padre" Sheehan likes what he sees thus far. Sheehan says, "this can be my best team yet. The pitching is deep. Power hitting won’t be our forte but stealing will be."

Captains Jose Rivera and Eric Grossman will lead the team. They made it clear from the start that players must be positive and stay together. There is no room for selfish and negative attitudes if the team is to succeed. When asked, why will this year be different? Rivera stated, "Eric and I work great together. Were veterans. We have seen other teams in the past beat us because they played smart team baseball. We always beat ourselves and together we can change that."

In the teams first action this fall, Baruch was victorious in a 13-8 battle with Old Westbury. Down 2-0, Baruch first baseman Sean Barrows hit a monstrous grand slam homerun. The lead was short lived as Westbury quickly tied the game in the third and went up 8-4 in the fourth. In the sixth, Baruch pushed across two runs and then Rivera tied the score with a two run single. Baruch scored again in the seventh for the win.

Baruch scored again in the seventh for the win.

Outfielder Willie Johnson said, "we heard defeat knocking and refused to let it in."

Other standouts on the day include pitchers Billy Olive and Tony Negron. Rookie Robert Lawton and Frank Perniciaro both threw seven innings, while Barrows made several defensive gems and had seven RBI’s on the day.

Pitching coach Kevin "Skip" McDermott is very happy thus far with his pitching staff. McDermott says, "a few guys decided not to return, but the rest of the pitchers picked up the slack. Our staff was good last year and we won’t skip a beat."

"The team’s practices have become very competitive, rather than just going through the motions, everyone is trying to out due the next guy. Rivera says, "everyone gets along well, we all try to help each other, not like the past."

The team has a brief fall schedule and will practice until the end of October. Then while the bears are hibernating in the winter, the ballplayers will be practicing indoors, getting ready for the spring season. Sounds like a lot of work? Well maybe it is but next year doesn’t come around very often.

Great Moments In Ticker Sports

"Baseball is 90% mental and the other half physical"
— Yogi Berra

"Tongue - in - Cheekly? TONGUE - IN - CHEEKLY? "
— Toni Colavito

"The Ticker never quits. What the hell."
— Rafael Martinez
