Registration Chaos, Baruch-Style

By Dusan Stojkovic

Although registering for Fall classes is no more than an almost-forgetten, five-minute telephone call for most Baruchians, incoming freshmen, as is custom at the College, had a more memorable experience.

On Thursday afternoon, the lastest group of incoming freshmen waitd outside the cafeteria of the 25th Street building, the makeshift registration area. The students huddled around tables with snacks and cups of soda, their expressions on their faces revealing mild migraines in some utter exasperation in others.

"It's been hectic, very hectic," said Elizabeth Bracero, admitting that the registration process was not running quite as smoothly as she had expected. "I need to drop a course, and I tried to do it over the phone, but I never got the PIN number (sic) in the mail, so now I have to wait here" she explained.

CUNY Canine Patrol

By Deirdre A. Hussey

Chancellor W. Ann Reynolds's plan to revamp security will bring patrol dogs to at least two campuses this semester, as security service claims they will employ 120 officers, the cost of this new security measure will cover by a Justice Department grant awarded to the University in May. But according to the Justice Department, the grant is to be used to hire officers only.

"We do people, not dogs," said Charles Miller, spokesperson for the Justice Department.

CUNY received $8.85 million community policing grant that will allow the University to hire an additional 120 officers. The grant is to cover the salary of the additional officers for three years with a promise from CUNY to match the funding so that the University will incur the cost in the future. No where does the grant stipulate that CUNY security initiate new security practices, such as patrol dogs, like the doi does claim.

CUNY is currently spending $30 million a year on security, which is funded by the University's operating budget, which has been a focal point of Governor George E. Pataki's budget

CUNY Budget

By Deirdre A. Hussey

The New York State budget was finally passed in July, 104 days late as members struggled to restore money to programs facing draconian cuts proposed by Governor George E. Pataki. Members supportive of CUNY were able to beat back the most severe cuts and avoid a tuition hike which Pataki had originally proposed in his budget for this year.

Pataki had originally planned a reduction of $56.7 million in the operating budget of CUNY, which allowed the Board of Trustees to declare a state of fiscal exigency. Fiscal exigency allows for the layoffs of tenured faculty, and requires each college president to submit a retrenchment plan which proposes departmental cuts that result in loss of faculty and services.

Baruch was slated to lose $8 million and roughly 60 faculty members and 30 support staff. The most alarming retrenchment plan was proposed at Queens College which called for the abolishment of the English Department, loss of 10 faculty members in the History Department, 3 in Math and 3 in Science.

But $40 million of the $56.7 million was restored, as well as complete reinstatement of SAP (Tuition Assistance Program) and a tuition hike avoided. But many are skeptical of the next year's budget, because the circumstances do not seem to be as favorable. This year the budget battle was extremely intense, with many as-sembly members facing reelection.

"But who knows what next year's budget will be like, because it will not be held in an election year," said Carl Aylman, Director of Student Life.

Election year aside, next year is the last year of Pataki's three year economic plan in which he promised major tax cuts residents of New York State.

"Next year will cause considerable concern," says Zane Berzin, spokesperson for Goldstein. "Pataki promised tax cuts will probably come and members will not be facing reelection. What it means for CUNY, one can only guess."
By Susan Stojekovic
On August 26, the Baruch Col­lege community mourned the death of Mayor Rudy Giuliani.
He died in New York City after a seven-year battle with cancer. He was 70 years old.
Giammattei, a 2006 graduate of Baruch College, said she was surprised and saddened by the news. "I was always impressed by Mayor Giuliani's dedication to public service," she said. "He was a great leader and an inspiration to many."

Welcome Back!!

Whether or not this is your first year at Baruch or your final semester, The Ticker will be providing you the most up-to-date news about our campus and what our administrators are doing to make our lives easier (or harder) as they make up new policies for us. We will also be providing you with music, film and other reviews in our Arts and Entertainment Section. Our Features Section will continue to give you such things as a writers corner, interviews on your fellow students who have done something special, interests that we feel you enjoy. Of course, there is also the Business Section, giving you the ups and downs and the all around of the Business students to write your opinions about anyone and anything about yourself, the college or the world-at-large. Lastly how can we forget our Sports Section. Slightly smaller from last year, we will still provide updates and articles about our Statesmen (that's the name of our sport teams).

We here at The Ticker wish you well in the coming year and hope that you make reading The Ticker a constant in your life here at Baruch.

American Viewpoints

A 'Complex equation' replaces grades and test scores in college admissions

By Colby L. Herd

On July 1, 1990, the University of California's Board of Regents ended affirmative action throughout the nine campuses in the state via Proposition 209, a ballot initiative prohibiting the consideration of race, gender, or ethnic origin in the hiring and promotion of faculty, staff, and students, as well as in contracting and concession negotiations. Said vote made California the first state in the nation to eliminate the use of affirmative action throughout the nine campuses in the state university system, thus prohibiting the state university system from giving minorities admissions preference in college admissions, as well as in hiring policies, and in all other policies and decisions, including in contracting and concessions. Said vote made California the first state in the nation to eliminate affirmative action throughout the nine campuses in the state university system, thus prohibiting the state university system from giving minorities admissions preference in college admissions, as well as in hiring policies, and in all other policies and decisions, including in contracting and concessions.

California at Berkeley. Affirmative action did not seek to give minorities the right to any job they wanted, to be able to have an ethnic-origin formula so hairsplitting that they could not even speak the language of the culture they were trying to help. It was not about affirmative action, but about equality, about giving everyone a chance to be successful. The result has been to open America to the world, to the diversity that has always been a part of our country, to the diversity that has always been part of our nation, to the diversity that has always been part of our culture, and to the diversity that has always been part of our history.

The 1990 California vote did not eliminate affirmative action, but it did change the way it was done. The new system of affirmative action is called "affirmative action in the workplace," and it has been a great success. It has not only helped minorities, but it has also helped the overall economy of the state. The California experience shows that affirmative action can work, and that it can help all Americans.

The Tobacco Industry Facing Changes In The Legal Environment

By Wen Yan

The tobacco market is facing new challenges to target millions of smokers in the United States and abroad. The Food and Drug Administration (FDA) has proposed new regulations to modernize the tobacco industry. This is the first time that the FDA has been granted authority to regulate tobacco products. The industry responded by appealing the regulations in court.

The tobacco industry has been in a state of flux in recent years. With the introduction of new regulations and lawsuits, the industry faces significant challenges. The tobacco industry continues to rely on Marlboro as its primary brand, but the company is working to diversify its portfolio to include more premium products.

The tobacco industry is facing increased scrutiny and regulation, which is expected to impact the company's bottom line. The industry is also facing increased competition from other forms of nicotine, such as e-cigarettes, which are becoming more popular among younger consumers.

The tobacco industry is also facing increased pressure to reduce its carbon footprint and address the environmental impact of its products. The company is investing in research and development to create more sustainable products, but the industry remains under pressure to do more.

The ram had been caught in a bush by its horns. Shofars, widely used in the Jewish calendar, are a reminder of the commandment given to Abraham from killing Isaac, pointing out a nearby ram for sacrifice. The first day of classes I thought this was my grand father. However, as the day progressed, it was proven wrong. I actually enjoyed learning about computers and how such concepts can be used to make life easier.

Hillel Notes:

By Ellen Steigman
Director, Hillel Center at Baruch College

Welcome Back, Baruchans!

The irony of technology is that computers, which were supposed to make our lives easier, now seem to become the worst nightmares of businesspeople. In the year 2000 problem will be affected by it. How Exactly is The Year 2000 Problem?

Most systems are a mix of 32 and 24 bit programming to store dates and save a few bytes by not using the next two digits of the year. (The worst mistake one could make) The same software amount that 00/00 is fine but the year 2000 problem is only going to be fixed in the year 2000.

If you do not believe me, test yourself! Don't let this happen to you. 

The year 2000 problem is a bit more sinister than you might think. If you are a business owner, you have to think about the possibility of the computer not recognizing the year 2000. If you are a computer technician, you have to think about your customers and the possibility of the computer not recognizing the year 2000.

What is the Year 2000 problem: The problem is about the amount of computers and computer programs that are being used for business operations. If the computer cannot distinguish between a 0 and a 1, then it will interpret the number as 1900 instead of 2000. This can cause a lot of problems, such as wrong calculations and programs not working properly.

Getting Specific: For example, a computer that is being used to run a retail business may not be able to process transactions properly because the year 2000 problem is preventing it from recognizing the current year.

Can We stop the bomb from exploding?

The objective of this article, is to provide information to businesses and computer users about the Year 2000 problem and how to fix it. The article will explain the causes of the problem and how it affects computers. It will also provide solutions to the problem and how to avoid it.

COME BY THE TICKER OFFICE (360 PAS ROOM 1523) BY FRIDAY SEPTEMBER 13, 1996 AND SPEAK TO IRA HERSCH, JOANNE GUO, OR ANY OTHER MEMBER OF THE TICKER STAFF OR CALL 212-802-6700/6800.

THE WATCHERS REBELLION, part 2

By Ira M. Hersch

I stand between the candle and the flame. Between the shadow, and the light.

I stand on a cliff.

Created by lightning.

Continuously being torn by

Sharp, clean points of the

pointed light.

Where I see the purple

dewy sky.

I see for infinity around

Infinity at night.

I stand at a point

Where we all once met.

Where illusion and reality meet.

I am The Watcher.

Welcome to my realm.

The place where good and evil coexist.

Where war and peace mean exactly the same thing.

Where love has no place,

And hatred has no meaning.

It is a place where

People have no color.

Where the sun sets out death,

And the darkness brings the life of another day.

Where life and death have the

same meaning.

Allies must be made for wars

not yet fought.

And enemies develop for

battles long over.

And those who declare

themselves neutral,

Cease to be seen.

Where time is the supreme

commodity.

Happiness in a strange paradox.

Sadness in an everyday occurrence.

And friendship is the medium

Between the two.

From this place

I firmly stand.

I have stood here for many

years now.

Building up my energy

And preparing for the challenge.

From this place

I see everyone and everything.

I can analyze, plot, predict,

Anticipate, react, attack, and

defend.

From my position in this realm.

I have stood here for many

years now.

A more complete person.

I can honestly say that as

time passes, I have become

more of a good person.

I have been in years.

A place of perfect happiness.

A place where good and evil

coopcrate.

I can see for infinity around

me.

I am The Watcher.

Welcome.

**Answer to Last Issue's Crossword and Wordfind.**

Correction: A word was misspelled "WIRED" instead of in the Crossword.

**Lone Star spotting**

By Manny Rodrigues

Style over substance is the preference of many reviewers and the summer movies of '96 were no exception. Even if the reviews were positive, the audience was often left with a feeling of disappointment. Here's a quick look at the biggest hits and flops of summer '96:

**Movies**

Distributors brought out their heavy hitters as early as May 10th, which was determined to be the ideal time to release the big-budget blockbusters. The box office was flooded with action-packed films that grossed over $200 million. Why? Special, very special effects. I may be stating the obvious but every year technology improves and the visual effects on the screen become more realistic looking and sounding. They affect our impression of a film so drastically that a weak dialog can go unnoticed by the average film goer. This also helps when your director is an unqualified cinematographer.

The other June release this month was "Mission: Impossible". The film grossed over $300,000,000 worldwide ($175,000,000 domestically). Many critics claimed the script was convoluted but I continued to watch and thought that they're pretty slow. This film was a simple spy film where the enemy was someone from the inside. Of all the summer action films, this one is put together best. Director Brian De Palma shows this film with averse as he builds suspense and film action with visual clarity. Unlike "The Rock" (Lewis Van Pelt) is the last true bodybuilder from the past and continues to make for engaging entertainment. The other is all the right moves for the right people. The music and special effects are all good and make for a great viewing experience. By Manny Rodrigues

By Manny Rodrigues

**The Phantom," starring Billy Zane, was not a hit.**

Jerry Lewis original, the film is a classic example of how a great deal of unexpected success can lead to the failure of a film. "Phantom" was released in 1996 and was a disappointment to many fans of the actor. However, the film managed to make a profit and was well received by the critics and audiences.

State Of The Statesmen:
Baruch College's Fall/Winter Sports

By Joseph M. Midlarelli

Welcome back, or to those incoming students, welcome to The Ticker's Sports Page. This year is going to be different from previous years in that the Sports Page is going to follow The Statesmen as they take on opponents within CUNY Athletics. Baruch is a Division III school, and this Fall is fielding six teams. Four of those teams are Women's including Volleyball (8-8 last year), Tennis (4-0), X-Country (2nd Place in the Hudson Valley Championships), and Finally Basketball (6-11). The Men's Basketball Team (17-10) are back, as also the Soccer Team after a one year absence from the schedule.

Speaking of schedules, below are listed the non-basketball teams 1996/97 schedules. The basketball teams schedules will be printed in our next issue. Though the paper comes out bi-monthly, we will try to keep everyone abreast of how our athletes, getting their views on academic and athletic life. Be printed in our next issue. Though the paper comes out bi-monthly, we will try to keep everyone abreast of how our Statesmen are doing in their perspective sports by posting the standings of each team. We will also run features on student athletes, getting their views on academic and athletic life.

*The Ticker Sports Page is currently looking for anyone interested in writing about any of the Baruch Statesmen*

*Teams. Please contact the Sports Editor at (212) 802-6800 if you would like to contribute.*

*The prof never covered this!*  
*Bye, meany, nasty, me*...

**Prayers for a miracle flood, fire or tornado.**

*The TA's kinda cute.*

*I knew I should have read the book.*

**I hope the curve is really low.**

*Soon, this will all be behind me.*

---

Here's fact-taking relief from the pressure of school: Graduating seniors and grad students can get a $100 cash back on the purchase or lease of any cool new Ford or Mercury! This includes the high-performance Mustangs! Call 1-800-321-1234 or visit our web site at http://www.ford.com for the full story.

*Because Your Brain Doesn't Have Wheels.*

---

*In an original, you may print ads on a minimum of two pages. In a variety of new print ads, current 1996 ads, and 1997. The position and number of your two page ads will be decided by your Editor. One or two ad pages may be used to create an advertisement.*
Don't Be A Chicken!

Do the Coolest Thing.
Give Blood.
