New Examination for Sophomores Introduced

continued from the front page

those who participated in the pilot test.

Students and faculty had an almost unanimous praise for their introduction of the ACE.

"It is in the favor of using this test as a prerequisite for further advancement," said Marketing Professor Roger Cable. "This is just another tool in the weapons arsenal, it should be revised." Baker took the pilot test and "liked it a lot." "Anything that raises the bar and makes students think, it is good," agreed Gerald Schmidt, professor of Marketing.

"When students take the ACE test they will have to think more," said Schmidt. "It is a test of endurance. It will prove if they can handle stress, and it will prepare them for graduate school," said Computer Information Systems Professor Sheryl Brabham.

Some students opted that they were not prepared and inoculated with new exams and wondered whether additional testing would be required.

"I don't agree with the ACE test," said Joe River, a Business Administration major. "I think that those placement exams, one should have to take another test." He said that passing all exams and courses should merit him a junior status.

Vicky Smith, another pilot "test" added, "I am all for ACE because I think it will provide an environment that deals with critical thinking." She found the five hour exam a bit long, however.

"Having students sit the ACE test will force them to learn more," said Schmidt. "It is a test of endurance. It will prove if they can handle stress, and it will prepare them for graduate school," said Computer Information Systems Professor Sheryl Brabham.

Abortion Linked to Breast Cancer, According To Study Co-Penned by Baruch Professor

By Vernon Chinchilli

A team of scientists headed by a Baruch faculty member released a controversial study early last Friday which concluded that having an induced abortion in the past is a central feature in the development of breast cancer in women. According to Chinchilli, 18 of the 23 studies indicated an increased risk for developing breast cancer in women who had had an induced abortion.

The study determined that the link between breast cancer and abortion transcends ethnic barriers, having been consistently found in women of European, African and Asian descent. Published studies report the effects of induced abortion in laboratory animals also support their conclusion, the researchers say.

"Abortion is the most common elective surgical procedure currently performed in the U.S.," the researchers maintain, pointing out that other voluntary health hazards such as smoking require thousands of lives sacrificed, and that changes in breast cells, resulting from the abortion, can be measured after a single exposure.

The danger for young, childless women in their twenties, in particular, was noted bySummey-Long, a pharmacist professor at the Milton S. Hershey Medical Center of Biostatistics and Epidemiology.

"The evidence is overwhelming," Chinchilli asserts, "The evidence is overwhelming." Chinchilli is associate director of the Center for Community Health. "Yet most women who have had an induced abortion are only too aware of the controversy surrounding the study and the controversy surrounding the study."

In the study and the controversy surrounding the study and the controversy, the focus of the research dated back to the first study in Japan, says Severs, adding, "The United States is still in the dark. Only three states require women to consider abortion be warned about breast cancer." In the United States, only Louisiana, Mississippi and Montana have such requirements.

Another of the study's four authors, Dr. Vernon Chinchilli, adds, "The evidence is overwhelming." Chinchilli is associate director of the Center for Biostatistics and Epidemiology at the Milton S. Hershey Medical Center of Pennsylvania State University, where most of the research for the study was processed. The meta-analysis included 23 separate studies with data on 33,967 women with breast cancer and a control group of 43,017 women of the same age and race with no history of breast cancer. According to Chinchilli, 18 of the 23 studies indicated an increased risk for developing breast cancer in women who had had an induced abortion.

THE PUBLIC ADVOCATE
Just Another Waste of Money

New York City Public Advocate Mark Green gave a speech at Baruch on October 15. Most of the audience was not elected officials, it was a problem that he should not be an elected official. Mr. Green was elected to a do-nothing post, one that when it was formally known as City Council President, was also a do-nothing post. While Mr. Green is a great consumer advocate, the office is unnecessary. Taxpayers spend over $100,000 to pay for his salary, never mind the costs of his staff of which he has 45. Mr. Green has done good things, but he also has the office's measure of getting ahead on the political ladder, i.e. running for mayor, or Senate.

A way to save taxpayer's money in these hard fiscal times is to get rid of waste. With a Consumer Affairs department, the city is wasting money by having duplicate services. The waste here is the Public Advocate's office, and one that should go the way of the Edsel.

THE ACE EXAM
A MISRUSTED OF FACULTY AND STUDENTS

Do we need another test to serve as a validation of a student's standing? The answer is no. The ACE Exam, soon to be given to students who have between 40 and 61 credits, will test students on critical thinking, essay writing, and comprehension skills. We have something like that already. It's called a base curriculum. You know, the academic standards that we need for graduation. Why should we be re-tested on material that we already passed in class? Could it be that the graduate proved we passed the classes already with high grades, but we already have a means of getting ahead on the political ladder, i.e. running for mayor, or Senate.

Why do we have to prove it again? Then if a student fails we already passed in class? Could it be that the graduate proved we passed the classes already with high grades, but we already have a means of getting ahead on the political ladder, i.e. running for mayor, or Senate.

TICKER

The American Crime Clock

1 woman is battered every 35 seconds.
4 women are raped every minute.
3 Americans are killed in alcohol-related traffic crashes each day.
Approximately six children are abused and neglected in America every minute.
A murder occurs every 28 minutes.
There is a robbery every 90 seconds.
There is a violent crime every 17 seconds.
There is an assault every 10 seconds.
The list goes on and on.

A nation of victims

The Republicans have
Forget Nader in their
campaign to get Bush
and Dole back in the
White House. Ralph
Nader, green winner
of a name from a book
that might be translated
"Unite at Any Speed," is
a political candidate
who is doing everything
but shut up. Nader
seems to want to make
people think that he has
something to say about
what goes on around him.
He will run for third
party representation
next month. He is running
on the third party ticket.

The supreme court of
global corporations—over
our government...

President. He is completely
satisfied by being a full
time citizen. In addition
he also has added to spend
less than $150,000 for his
campaign depending mostly
on free TV and radio interviews. He will
not raise money or accept contributions
terms of the TV network. He is unwilling
to visit the people. Nader's strongest
top is that he is a simple total,
believer in consumer interests and has
lined up virtually all food and drugs,
plus tax politics.

He has never owned a single
car. He uses public transit,
trains, subways, subways and
buses. He cannot even cope
in a manual typewriter.

Presently he is running as
the Green Party's
candidate in 21 states
including New York
even though he will not accept the
party's platform. He does not
have plans to join the Green Party,
which is an environmental group
that supports such things as abortion
rights and no national
taxes. Nader considers the
latter to be issues of "good politics" or
expresses indifference towards "I
don't want to lose..."

Thres. looking for
"strengthening our democracy" issue
while the issue of
"progressive tax." he says, "like politicians, do
have an influence on
anything under the sun."

This would seem to be the "un-candidate" running for president.

The race is on for drug
corporations to produce
new treatments looking
to prolong the lives of
virus stricken patients.

"They will be right there to profit
off of..." Any profit that will be made
from these new drugs
will be made because of their
use in the treatment of patients.

AIDS, Wealth, and Triple-Drug Therapy

By Balz Riskin

The race is on for
drug companies to produce
new treatments looking
to prolong the lives of
virus stricken patients.

"They will be right there to profit
off of..." Any profit that will be made
from these new drugs
will be made because of their
use in the treatment of patients.

In Nader's view, these treatments
are not easy tasks.

Nader also has a way of..." But that is no easy task.

With an incredible growth
in the need for pharmaceutical
companies to help keep
the HIV virus at bay.

Already positive
experiences with some drug
and place patients need to be
adaptable to the treatment of
people infected with HIV.

"To date there has been
improvement in treatment
that may include a new drug or a
combination of drugs.

While AZT is one of the most
common drugs used for the
AIDS virus, AZT will not be able to
suffer the market.

Because of some..." And others that are
growing at rates even slower
than its sometimes define.

The combination of drugs
with AZT is called "triple-drug
therapy." This therapy may be
good news for the war against AIDS.

But the market for these
drugs is no wonder in
the unhealthy world of nations
and the health of the entire
world. The rest of the world will be
easily accessible.

In America there are more than
700,000 people who are
AIDS patients and triple-drug
therapy patients.

"Triple-drug therapy..." Philippines are
innocent of any form of..." And just
begin to emerge to the
public.

Here is no easy task.

AIDS therapy is not easy to
get. It does not work in the..." And others that are
getting at the worst
economic growth rates.

Tigers Way, The Best Way?

The Widening Gap Between The Rich & Poor

continued on page 9

while criminals are held off. This
effectively removed the onus on
debts owing to the Chapter 7 Bank-
rupcy, which calls for an immedi-
te dissolution and liquidation of the
failed company.

Corporations recently received
another tax bonus. A recent Business
Week article entitled "Advanta-
gue Dealers" reported that they
had found a hidden in the tax code
law which does not even pro-
vide a way above the poverty line
is a provision which will allow cor-
porations to retain their deferred
investment banking fees incurred
in 1987. These defenses were
eliminated by the 1986 Tax Re-
form in an attempt to curb the large
amounts of debt most corpo-
rations are taking on. However,
even then companies took the de-
fusion anyway because they felt
confident they could successfully
avoid its IRS challenges on the
issue. When Kolven Krause &
Roberts bought out RJR Nelson,
it insured $1 million in fees which it
will now be able to offset against
current earnings. Who is going to
make up for the fees in revenue?

Another tax law provision
which could affect the spending
set operating loss. This allows a
loss of up to $100,000 in taxes on future profits and receive a
return of any taxes paid during
the three years prior to the loss.

This provision proved helpful for
many of the failed Savings & Loan
companies which remained in business
and "restructured" under the provisions
of Chapter 11, and are currently
making profits, using the break
from past years to offset them and
not getting hit with a stiff tax. A stiff
provision doesn't exist for indi-
ciduals.

Before the fall of communism,
many countries had more incentive
to treat their workers better, as long
as there was an alternative
system. Now, in worse states in the
developed marketplaces, companies
have to be more competitive. Thus,
they are paying top overseas wages
while eliminating lower level pro-
operas overseas where labor
and material costs are much cheaper.
For example, AT&T's Chairman
Robert Allen realized a large
raise while simultaneously laying
off American workers in connec-
tion with the recent restructuring
of the company in response to de-
regulation of the communications
industry.

Further, fearing future tax in-
creases, many companies have been
structuring deferred compensation
as a way to keep their key employees.
A deferred compensation plan,
entirely funded by the executive's compensation and in-
herited as a net operating loss. This allows a
loss of up to $100,000 in taxes on future profits and receive a
return of any taxes paid during
the three years prior to the loss.

This provision proved helpful for
many of the failed Savings & Loan
companies which remained in business
and "restructured" under the provisions
of Chapter 11, and are currently
making profits, using the break

A deferred compensation plan,
entirely funded by the executive's compensation and in-
herited as a net operating loss. This allows a
loss of up to $100,000 in taxes on future profits and receive a
return of any taxes paid during
the three years prior to the loss.

This provision proved helpful for
many of the failed Savings & Loan
companies which remained in business
and "restructured" under the provisions
of Chapter 11, and are currently
making profits, using the break
from past years to offset them and
not getting hit with a stiff tax. A stiff
provision doesn't exist for indi-
ciduals.

Before the fall of communism,
many countries had more incentive
to treat their workers better, as long
as there was an alternative
system. Now, in worse states in the
developed marketplaces, companies
have to be more competitive. Thus,
they are paying top overseas wages
while eliminating lower level pro-
operas overseas where labor
and material costs are much cheaper.
o

CONTACT LENS SURVEY

Subjects needed to participate in a lens usage survey. The purpose of this survey is to evaluate fitting characteristics of disposable contact lenses. All contact lenses* and solutions will be provided. You will need to be examined 3 times over 3 weeks. Enrollee 10/19/96 12/19/96.

Surgery limited to acceptable fit with Avaira, Focus or Focus Toric contact lenses.

*The initial comprehensive exam to assess overall visual functioning and your health status will be required to participate in the lens usage survey. For this comprehensive evaluation $48. At that time the eligibility will be determined.

THE FRIENDLY SKIES
JUST GOT FRIENDLIER
Welcoming The Use Of Frequent Flyer Programs

by Charles H. Bernard

Joining one or more frequent flyer programs can actually get you on your way to a vacation spot for free! Even if you fly once a year or once a week, being a member of a frequent flyer program has a variety of benefits. Most major airlines offer a frequent flyer program and will start you off with bonus miles as an incentive to join their program. Bonus miles can range from 2,000 to 5,000 miles or more, depending on the airline. TWA, for instance, will start you off with 3,000 miles just for joining. In some cases, with little as 20,000 miles, you are eligible for one round-trip ticket to any location in the Continental United States. Some restrictions apply. Joining a program is easy. There is no charge for joining frequent flyer programs which makes it easy for you to join one or all of them. One of the benefits of joining more than one program is it's never certain whether a member of a specific airline but it would be comforting to know that as worldwide, the choice of airlines might be free, your frequent flyer program will continue to work.

With most of us wanting to get there as quickly as possible, so we try to get on a nonstop flight. However, before you decide to choose a flight because it's a connecting flight, weight is not of the essence in your travel plans, twice. Some airlines have a minimum number of miles given for small trips. For instance, a round trip flight with US Air from Newark to Orlando will credit you with 860 miles. The connecting flight through Pittsburgh earns your account with 534 miles; because from Newark to Pittsburgh earns the minimum number of miles and from Pittsburgh to Orlando earns 850 miles. In addition to earning a minimum of 500 miles on some flights, some airlines promote a double or triple bonus offer in connection with rental car companies, netting you up to 1,600 miles. National Car Rental will give you a 10% discount on a car rental if you are a frequent traveler member with US Air. In addition to the 10% discount, you are eligible for 500 frequent flyer miles. Auto Car Rental and Hertz have similar programs. In many instances, car rental companies have specials, such as when you decide not to choose a flight. When time is not of the essence on some flights, because it's a connecting flight, there is usually no fee. Most major airlines have specials, such as "Top Bangs For The Buck" for small trips. For instance, a 1,000 mile flight cost $80. Upgrading to first is free for gold members from any fare, however, purchase members can upgrade only from a full fare ticket.

You can even get frequent flyer miles from your long distance carrier. AT&T, in connection with a program, will credit your frequent flyer account with 5 miles for every dollar you spend in long distance. This offer of AT&T is only available when you sign up for AT&T's Trip Rewards Program.

Joining a frequent flyer program is not necessarily for

The "Frequent Flyer" Anyone can join and fly free to somewhere of their choice, eventually. Free flying is not the only advantage to enrolling in a frequent flyer program. There are other important incentives to join and these incentives only get better as time passes and events, such as fare wars, occur. For information on frequent flyer programs contact your airlines of choice, or, call 800-223-3222. Phone numbers for the companies mentioned in this section are:

American Airlines (800) 433-7300
Continental (800) 231-0800
Delta (800) 221-0233
United (800) 231-0826

Visa 1-800-843-0400
American Express 1-800-223-4000

THOSE LUCKY STIFFS!

by Sergio Taboacuo

Lucky Stiff is the most recent production coming out of the Five/ Performing Arts Department. Written and directed by Stephen Fishelberry and the book and lyrics written by Lynne Ahrens, this play is based on The Man who Broke the Bank at Monte Carlo, by Michael Butcherott. Lucky Stiff has eleven cast members and approximately 30 crew people.

This play is directed by Eleanor Ferrar (professor in the Fine/ Performing Arts Department) would be described as an ensemble production. This means, for people who did not know this such as myself, that there are no lead female or male roles. Everyone in the cast is required to play different parts. Sometimes several roles are assigned to one cast member. Such is the case with Ben Perry, an upper sophomore at Baruch. He has previous acting with Anything (previously known as Barshur) play production and he plays the parts of a French Emee, a British Jack, as well as a French Burrito (all accents are accurate). The members of the cast are all of various status, and not all acting majors. Laurel B. St. James, a senior at Baruch, who plays the part of Rita says, "I am excited to be casted on the boards again." She has been acting appearing as a member of Actors Equity Union (Michael Oii, and a member of the Theater Major Film Student has several Baruch productions under his belt, such as Count Dracula, Anything else as well as Dramatics and the Lion. Michael plays the part of Harry Jones. Jenell plays the part of an English lady, while Amy Flores describes her roles as inter-changeable which includes an ensemble singer.

"...there are no lead female or male roles. Everyone in the cast is required to play different parts."

Lucky Stiff is described as Ferrar as a fast and fun Murder/Mystery/Comedy. The cast director is a British offi- shie student who order $10 to $20 an hour from an uncle in New York with the stipula- tion of the uncle returning with him to Monte Carlo to claim the funds. The little meets an un- tially death and is shown to be a bystander. The audience is confused with the charac- ter at the funeral. Lucky Stiff will be run- ning at New York Street Volunteers from October 18th through November 26th with an admission fee of $10. It will be located at the 17-Leaping Horse Street building in the Studio Theatre room 931.

The Lucky Stiff Crew

by Mark D. Higgins

I had the dubious honor of reviewing The California Burrito Company for this issue. I must admit I was a bit skeptical about this review from the outset. It was recommended to me by a friend that is well, no longer a friend. Only so called "friends" in the food like right? I had the "Original California" which was to my dismay, unsatisfac- tory. Tasty in the best way, it was too dry. This burrito included, as described by the waiter, "Chicken, rice, jack cheese, lettuce, tomato and sour cream." The sour cream and guacamole was too salty to be eaten by itself. This burrito was made up of pre-packaged rice and some foreign matter that did not even resemble chicken. Perhaps it was chicken, but just barely. The lettuce was also non-existent and the jack cheese was about as bland as cheese can get. They must know their burritos in this area (even compared to Tama Bail, which was a shock to me).

Drucker, who accompanied me on this review, said it best, "This burrito is just too difficult to eat." He was referring to the fact that the burrito was not user- friendly. The shell was too in- flexible making the burrito very difficult to eat without having it all over yourself. To make things even worse, the sauce (at least in theory) is supposed to be a "Green," in comparison to the "Regular," which would have been enough to form an opinion. I was also disconcerted with the service. The staff was about as unskilled as it can get. I had no one near me and the waiter never came. I gave up before one very observant de- mander. "I want to speak to the manager." A simple request for additional salads was met with a grunt and a sarcastic, "Any- thing else?"

The only upside to this place is its location. It is di- rectly above the 6 line, which makes it an existing target for a quick bite to go. Forget it.

Don't get anything above the 6 line, which is right above Tama Bell and get a better burrito for half the price.

My overall rating for this establishment is a C. What do you think?

The California Burrito Company

No Gracias

The internet is nothing more than a bunch of "central computers" around the world that are always "on the phone" with each other. To put it another way, a person wishes to connect to the Internet, his computer dials the "central computer" and the phone line to the "central computer" is the "phone." When millions of people all join the conversation at the same time, they may all speak in different languages. The Internet is not one big computer, but consists of several computers which can be utilized by anybody. The Internet is a "local computer service." No one is in control of the Internet, at least not one person. The Internet is everything, and it is nothing. It is nothing more than a bunch of "central computers" around the world that are always "on the phone" with each other.

The internet is nothing more than a bunch of "central computers" around the world that are always "on the phone" with each other.

SEADOM
Association of Dominican Students

At SEADOM we are a culturally based organization. We believe in preserving our heritage while exposing other ethnic groups to the richness and diversity of our New York City. We are interested in meeting, talking, and learning about other students engaged in marketing activity and other careers. We provide an arena where speakers are invited to talk about their career advancement, and to guide them toward the profession they wish to enter. We are an ever growing happy family, where you can meet people that are not just Puerto Rican people, improve your networking skills, get financial planning workshops on different topics of interest, and to discuss new things about other people’s cultures, including our own.

P.R.I.D.E.

We are an ever growing happy family, where you meet most people that are not just Puerto Rican. We’re a place where you can feel comfortable, where everyone looks out for everyone else. We help you out with school, friends, family, and it’s all a place where you can talk, laugh, and relax from school and family. We want to let you know that there’s new things about other people’s culture that you can learn about here.

We meet in the 326 building room in Room 424 at 26th Street - Building 2.

THE BUREACRATS CHAIR

What is it? You’ve seen it in the markets. The office. The bank. The place where you have to show your picture ID, or you just can’t use your credit card. You’ve seen the window where you have to pay your rent, or you have to pay for something. This is the place where we meet. We are a group of students who meet to work on different things. We do things like: we meet to work on different things.

We meet in the 326 building. Room 424 at 26th Street - Building 2.

The busines to business conference is an event that promotes understanding and brings the real world of industrial and occupational environments to our members. Our goal is to help members to be better prepared for association career advancement, and to guide them toward the marketing activity of organizations that engage themselves in marketing or other businesses. We have individuals in this area who are interested in talking to a variety of clients, industry representatives, and others. The conference is designed to provide participants with valuable information about current issues that we feel are pertinent to the advancement of our students. The conference is being held on a Saturday at 12:25-2:30 pm.

Don’t Sleep On Barry Levinson’s “Sleepers.”

By Manny Rodriguez

Nothing hits harder than reality. Which is probably the reason why many of the best films are based on real-life occurrences and events. Thus, the reason why Barry Levinson’s “Sleepers” is based on the controversial book written by Lorenzo Carcaterra."Sleepers" is an examination of the New York City slums in the late 1960’s. The boy’s childhood friend and relief as the defense attorney for the happenings, the story proceeds to their adulthood in the early 1980’s. Levinson could have spent less time on dramatizing certain events in the early segments of the film, but the overall result is top notch. We are able to learn who they are before they wind up in the reform school. Levinson’s best directorial work to date. The only problem I had was that Hanks didn’t deliver enough into how much the music industry abuses its artists for profit. Hanks addressed the issue in too much of a one-sided manner. However, it does take the overall result of the film. "That Thing You Do" is a bright spot in 1996. It is a funny, swift movin...
Robert Sauer — The Ticker (October 2, 1996, page 7)

I just laugh. It is truly miserable to be one of the minority; it is truly a role that is ascribed as one of the least. They can only laugh when you ask for something they have never seen. They have never experienced the difference in your life. They only know their own life. They only have their safety zones, which have nothing to do with anything.

The realms of the American Dream are veiled as they see the reality that Blacks and Latinos are still stricken as they are led to believe. The ghettos have turned the page, and kept running. "Our situation," Mirta Calderon wrote, "is a sardine factory. The realms of the American dream .. .I'd still kill by a Latino officer because of the color of my skin. It is truly miserable to be one of the minority. I, myself, Columbus' description, could be a recent outgrowth of one's own, "hop's stated facts (the love between two homophile) leaves the center of hip hop social values. For instance, there's being a homosexual, a heterosexual, and also be hip hop to understand our way of telling our history and experiences must live with in order to be righteous.

The Train

Life is a train, sometimes it drives us insane.

death, and we never forget that they were a beat. Also like a train, they make no mistakes, sometimes we get caught sometimes we get a break. Also like a train, they go to places far away.

The only two things guaranteed are life and death, and eventually we all die. Do not ride the rails that come from Long Island, and do not let them keep us smiling because this train brought us sorrow and pain, and it rides on the rails that come from Long Island, and it was all because of that Long Island train.

But this train did not stop in time and instead keep them some feet away.

We want to remember the good times in the past and we never forget that they were a beat. Also like a train, they make no mistakes, sometimes we get caught sometimes we get a break. Also like a train, they go to places far away.

The only two things guaranteed are life and death, and eventually we all die. Do not ride the rails that come from Long Island, and do not let them keep us smiling because this train brought us sorrow and pain, and it rides on the rails that come from Long Island, and it was all because of that Long Island train."

R.I.P.-Steve, Keith, and George 9/26/97

Traversals

A Short Ode To Melancholy

Above the wide, and hard cold leaves of time you artained by the flying man of the seasons in the plains.

You appear vocal and shivering and my heart feels the joy of a silent word, and keeps it in the whispering grass across the graves, and the softest, a maintained source, dreamed and remote.

Upright and joined, you gather the folded part, destroyed near the bone.

How much you want from the land, how deep, how far you feel you.

Yes, like the air

inside the monument and flaming.

You pass with the tubes of the ocean and the seared brilliance of the skim, last ideas, that appear

wished from the wind, where the red bastard flies and nests, while the night

turns and calls anxiously beneath the flowery shadows my dying, yet still, I.G.

Why

I see myself standing all alone.

What ever I am doing all the space wrong.

What Is so many falling at the same time?

Why Is it so hard to be different, yet still the same?

Why Is it so hard to be different, yet still the same?

Why Is so many falling at the same time?

Why? -Jose Graham

PROJECT ASCEND
• FIND OUT ABOUT DOCTORAL STUDY IN:
  - BUSINESS
  - COMPUTER SCIENCE
  - ECONOMICS
  - EDUCATIONAL
  - FINANCIAL
  - HUMAN SERVICES
  - INTERDISCIPLINARY
  - LAW
  - PSYCHOLOGY
  - SPEECH & HEARING

DO YOU...
• WANT INFORMATION ABOUT CAREER OPPORTUNITIES AVAILABLE TO INDIVIDUALS WHO OBTAIN A DOCTORATE?
• KNOW THAT FINANCIAL AID COULD PAY 100% OF YOUR COST?
• WANT INFORMATION ABOUT CAREER OPPORTUNITIES AVAILABLE TO INDIVIDUALS WHO OBTAIN A DOCTORATE?

IF YOU WANT ANSWERS TO THESE QUESTIONS, YOU’LL WANT TO HEAR ABOUT PROJECT ASCEND

PROJECT ASCEND is an interactive program which gives you information about your future career options, particularly if you’re interested in studying at the doctoral level.

You’re invited to attend a SEMINAR on Wednesday, October 23, 1996 at BARUCH COLLEGE 6TH FLOOR ROOM 1701

1:00 - 3:00

The ceremony will be held at 8:15 PM on Saturday, October 19th in the Emmanuel Sales Lecture Hall 17 Lexington Avenue

Congratulations to the Fall 1996 Inductees of Golden Key National Honor Society and to the Society’s New Honorary Members

Mr. Jerome Berg
Member of the Board of Trustees of the City University of New York
Dr. Sidney Littmann
Dean of the School of Business
Dr. Paula Berggren
Professor of English
Mr. Pauline Tansey
Department of Economics and Finance

Player Profiles:
Women’s Volleyball

By Ming Wong

• Marsha Friedman #15 Middle Blocker
  Major: Accounting

One of the few seniors on the team. Marsha has the heart and soul of the team and one of the team’s three captains. She is the team’s biggest hitter and the best server by far despite the fact that she is playing with sore ligaments in her back. Marsha is the most vocal leader on the team as well the floor general.

• Jen Phan #4 Outside Hitter/Setter
  Major: Accounting

Jen is another senior and captain of the volleyball team. She might not be the biggest or the most vocal but she understands how to spike the ball. She is one of the team’s best hitters and best servers.

• Linette Sasso #9 Outside Hitter/Setter
  Major: Accounting

Linette, a sophomore and the third captain on the team, is slowly becoming the most consistent player of the Lady Statesmen. She is quiet but her play is everything that the Statesmen need in order to be successful. She plays with a lot of commitment and always does her job and more.

• Maria Campos #14 Outside Hitter
  Major: Accounting

Maria, a freshman, is the designated team flyer and is the most talked about member of the team. She is always laughing and off of the court, even when she is diving out of the court. Maria, one of the biggest hitters on the team, is always standing across the net with the server trying to give her a free shot.

• Nancy Diaz #4 Outside Hitter/Setter
  Major: Accounting

Nancy, another freshman, is like the Energizer bunny, she just keeps going and going. Full of energy, Nancy is a self-proclaimed “athletic witch”. She enjoys a variety of sports but is in love with volleyball as one of her favorites. She plays with a lot of heart and always pushes her teammates to do the same.

Mock Career Reception

Real Food!!!

Mock Recruiters...

Can you interview virtually?

How do you do on the hidden interview?

Don’t miss this important event.

Your Career can be made or broken at the interview because companies frequently interview candidates at receptions. Here they observe interpersonal skills and decide who to hire, so select for a second interview.

*Business attire required.

October 2 - Baruch 3 Medgar Evers 0

Baruch started out the first game slowly against a Medgar Evers team that was not very good. There was poor miscommunication and a lack of intensity that caused Baruch to be down 8-12 against a team that they should have little difficulty against. They picked it up halfway into the game. They knotted it up at 12 and pulled ahead to win 15-13.

The second and third games were the opposition, 15-5.

Medgar Evers was clearly outmatched as the ladies of Baruch began playing their game. Baruch went on a 12-0 run and closed out the opposition, 15-5.

Baruch played a mediocre York game, 11-15.

In the first game, Baruch again was missing several key players and, of Baruch's Lady Statesmen, only Linette Sasso and Nai-Pu Cheng, then began to lead the inexperienced bunch back into the game. Nai-Pu's crisp setting and Marsha's big hitting and serves made the game closer but was not enough to come back. Baruch loses 13-15, but not without a gritty fight.

Player of the game honors went to both Nai-Pu Cheng and Marsha Fridman for their grit and determination.

October 9 - Baruch 0 USMMA 3

This was supposed to be a game to use as a measuring stick to see how good these Lady Statesmen really are. USMMA is one of the better teams in the conference and it was up to Baruch to prove that they also belonged in that category. USMMA looked like some snooty bunch of stuck-up rah-rah types.

As usual Baruch began slowly in their first game. They made errors that could have been avoided to open the game up, 0-6. It was not a game that Baruch was proud of as they get steamrolled, 3-15.

In the second game, Baruch picked up the intensity level and lead 4-0 to begin. Unfortunately they reverted to their old ways and gave up 6 straight points. They came back with 6 unanswered of their own and clung on to 13-10 advantage.

The two teams then went at it with each other's best, ending up in a 14 all knot. Both teams dug deep but USMMA came up ahead in the 15-17 nail-biter.

The third game was another game of streaks. Baruch started out with 2 straight, then gave up 8 in a row little behind 3-9. The veterans, Marsha Fridman and Nai-Pu Cheng, then began to lead the inexperienced bunch back into the game. Nai-Pu's crisp setting and Marsha's big hitting and serves made the game closer but was not enough to come back. Baruch loses 13-15, but not without a gritty fight.

Player of the game honors went to both Nai-Pu Cheng and Marsha Fridman for their grit and determination.

October 12 - Baruch 0 Mountclair State 3

For Baruch, losers of 3 straight and winless since the game against York, the road did not get any easier against Mountclair State. They were another formidable team that had players that gathered together after every point and cheer.

After the conclusion of the game, Coach Ivy chatted to me about the game. They (Mountclair State's big players) certainly didn't help our cause. She (Marsha Fridman) would have definitely helped if Jen played well in her place," said a proud Coach Ivy.
